West, 2014-04-22 At the dawn of the last century leading scientists and politicians giddily predicted that science especially Darwinian biology would supply solutions to all the intractable problems of American society from crime to poverty to sexual maladjustment Instead politics and culture were dehumanized as scientific experts began treating human beings as little more than animals or machines In criminal justice these experts denied the existence of free will and proposed replacing punishment with invasive cures such as the lobotomy In welfare they proposed eliminating the poor by sterilizing those deemed biologically unfit In business they urged the selection of workers based on racist theories of human evolution and the development of advertising methods to more effectively manipulate consumer behavior In sex education they advocated creating a new sexual morality based on normal mammalian behavior without regard to longstanding ethical and religious imperatives Based on extensive research with primary sources and archival materials John G West s captivating *Darwin Day in America* tells the story of how American public policy has been corrupted by scientific ideology Marshaling fascinating anecdotes and damning quotations West s narrative explores the far reaching consequences for society when scientists and politicians deny the essential differences between human beings and the rest of nature It also exposes the disastrous results that ensue when experts claiming to speak for science turn out to be wrong West concludes with a powerful plea for the restoration of democratic accountability in an age of experts *Teaching American History in a Global Context* Carl J. The Untold History of the United States, Volume 1 Oliver Stone, Peter Kuznick, 2014-12-09. The truth about America is revealed in this first of four volumes of the young readers edition of *The Untold History of the United States* from Academy Award-winning director Oliver Stone and Peter Kuznick, adapted by Susan Campbell Bartoletti. There is history as we know it. And there is history we should have known. Complete with photos, illustrations, and little-known documents, this first of four volumes covers crucial moments in American history from the late nineteenth century to the dropping of the atomic bomb on Hiroshima and Nagasaki. This is not the kind of history taught in schools or normally presented on television or in popular movies. This riveting young readers edition challenges prevailing orthodoxies to reveal the dark reality about the rise and fall of the American empire for curious budding historians who are hungry for the truth. Based on the latest archival findings and recently declassified information, this book will come as a surprise to the vast majority of students and their teachers, and that's precisely why this edition is such a crucial counterpoint to today's history textbooks. Adapted by Newbery Honor recipient Susan Campbell Bartoletti from the bestselling book and companion to the documentary *The Untold History of the United States* by Academy Award-winning director Oliver Stone and renowned historian Peter Kuznick, this volume presents young readers with a powerful and provocative look at the past century of American imperialism.
