Integrating Social and Behavioral Sciences Within the Weather Enterprise National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Division on Earth and Life Studies, Board on Human-Systems Integration, Board on Environmental Change and Society, Board on Atmospheric Sciences and Climate, Committee on Advancing Social and Behavioral Science Research and Application Within the Weather Enterprise, 2018-02-05 Our ability to observe and forecast severe weather events has improved markedly over the past few decades Forecasts of snow and ice storms hurricanes and storm surge extreme heat and other severe weather events are made with greater accuracy geographic specificity and lead time to allow people and communities to take appropriate protective measures Yet hazardous weather continues to cause loss of life and result in other preventable social costs There is growing recognition that a host of social and behavioral factors affect how we prepare for observe predict respond to and are impacted by weather hazards For example an individual's response to a severe weather event may depend on their understanding of the forecast prior experience with severe weather concerns about their other family members or property their capacity to take the recommended protective actions and numerous other factors Indeed it is these factors that can determine whether or not a potential hazard becomes an actual disaster Thus it is essential to bring to bear expertise in the social and behavioral sciences SBS including disciplines such as anthropology communication demography economics geography political science psychology and sociology to understand how people's knowledge experiences perceptions and

attitudes shape their responses to weather risks and to understand how human cognitive and social dynamics affect the forecast process itself Integrating Social and Behavioral Sciences Within the Weather Enterprise explores and provides guidance on the challenges of integrating social and behavioral sciences within the weather enterprise It assesses current SBS activities describes the potential value of improved integration of SBS and barriers that impede this integration develops a research agenda and identifies infrastructural and institutional arrangements for successfully pursuing SBS weather research and the transfer of relevant findings to operational settings

Superstorm Kathryn Miles, 2014-10-16 The first complete moment by moment account of the largest Atlantic storm system ever recorded a hurricane like no other The sky was lit by a full moon on October 29 2012 but nobody on the eastern seaboard of the United States could see it Everything had been consumed by cloud The storm's immensity caught the attention of scientists on the International Space Station Even from there it seemed almost limitless 1.8 million square feet of tightly coiled bands so huge they filled the windows of the Station It was the largest storm anyone had ever seen Initially a tropical storm Sandy had grown into a hybrid monster It charged across open ocean picking up strength with every step baffling meteorologists and scientists officials and emergency managers even the traditional maritime wisdom of sailors and seamen What exactly was this thing By the time anyone decided it was too late And then the storm made landfall Sandy was not just enormous it was also unprecedented As a result the entire nation was left flat footed The National Oceanic and Atmospheric Administration couldn't issue reliable warnings the Coast Guard didn't know what to do In *Superstorm* journalist Kathryn Miles takes readers inside the maelstrom detailing the stories of dedicated professionals at the National Hurricane Center and National Weather Service The characters include a forecaster who risked his job to sound the alarm in New Jersey the crew of the ill fated tall ship *Bounty* Mayor Bloomberg Governor Christie and countless coastal residents whose homes and lives were torn apart and then left to wonder When is the next superstorm coming
