The Essay Examination

UWF Writing Lab

(from Guth, *Words and Ideas*)

Learn to write a structured essay examination that makes the best possible use of what you know.

For many students, the most direct test of their writing ability is the essay examination. To improve your own performance on such examination, remember the following points:

1. Study not for total recall, but for a writing test. In studying for material, identify the key terms that might provide the focal point for a paragraph or short essay: alienation, irony, agrarianism. Fix firmly in your mind the three or four points you would cover if asked to trace the major step in an argument, or the key stages in a process. Then, for each key term or major point, try to retain a supporting detail that would help you define or illustrate it. Do not merely memorize material; ask yourself practice questions that make you select and arrange materials in different ways to prove a point, to trace a comparison.
2. Memorize verbatim at least some key phrases, definitions, or short passages. The use of these key phrases, definitions, and/or short passages will give an authoritative, authentic air to your writing. Nothing more reliably identifies the student who aims at better than "C" than the sentence that follows a pattern like the example below:
The term _____, which Frederick Marcus defines as " _____," has developed two important applications. . . .
Michael Benchard, whom Thomas Hardy describes as " _____," was aware of his own capacity for impulsive action. . . .
3. Determine exactly what the instructions ask you to do. Do not simply get a general notion of what the question is "about." Assume the question in a history course is "What do you consider the most important difference between the fall of Greece and the fall of Rome?" Focus on the key word in the instructions: difference. What is the difference? How can you line up material that will bring out this difference as clearly and convincingly as possible? Look also for specific writing instructions: Are you being asked to summarize, to define, to compare, to evaluate, or merely, more vaguely, to discuss?
4. No matter what the pressure of time is, take time to structure your answer. Come straight to the point. Especially in a one-paragraph answer, make your very first sentence sum up your key point or your answer to the question being asked. Then use the rest of the paragraph to explain, support, or argue your point. Select what is clearly relevant; try to avoid a mere rambling effect. Whenever you can, work for a brief outline jotted down on scratch paper before you begin to write.

In addition to these basic points, here are a few practical hints:

- Bring an extra pen.
- Budget your time, especially if there are several questions. If you gain five points by treating one question at great length and then lose twenty-five points by slighting the next two questions, you are twenty points behind.
- Get a general picture of the examination before you start writing. If there are several questions or topics, work first on those that you feel best qualified to take up.
- Relax. You will need a cool head to read the instructions without missing an important point.
