Accountability, Pragmatic Aims, and the American University Ana M. Martínez-Alemán, 2012-03-12 Accountability Pragmatic Aims and the American University frames the debates on teaching and learning accountability in Higher Education By examining significant historic periods in Higher Education Martínez Alemán explores the present apprehension about accountability in today's colleges and universities Throughout the book's chapters Martínez Alemán uses the pragmatic philosophy of John Dewey to enlighten current understandings of professional freedoms and she also discusses democratic imperatives in light of accountability obligations the teaching of undergraduates data and empirical research on college teaching and learning and the institutional policies for graduate student and faculty teaching development This book reveals the tensions between the democratic character of the university qualities that may seem irreconcilable with accountability metrics and the corporate or managerial economies of modern American universities Higher Education faculty administrators public policy makers and students enrolled in Higher Education Masters and PhD programs will find that this book informs their practice and will serve to contribute to the debates on accountability for years to come The American University Magazine, 1895 **The Americana** Frederick Converse Beach, George Edwin Rines, 1908 **The Academic Library in the United States** Mark L. McCallon, John Mark Tucker, 2022-10-10 This book advances the belief that the library more than any other cultural institution collects curates and distributes the results of human thought Essays broaden the debate about academic libraries beyond only professional circles promoting the library as a vital resource for the whole of higher education Topics range from library histories to explorations of changing media Essayists connect modern libraries to the remarkable dream of Alexandria's ancient library facilitating groundbreaking research in every imaginable field of human interest past present and future Academic librarians who are most familiar with historical traditions are best qualified to promote the library as an important aspect of teaching and learning as well as to develop resources that will enlighten future generations of readers The intellectual tools for compelling constructive conversation come from the narrative of the library in its many iterations from the largest research university to the smallest liberal arts or community college **The American University Journal of International Law and Policy**, 1918 **Abraham Lincoln** Robert Dickinson Sheppard, 1903 **James Otis** John Clark Ridpath, 1903 **George Washington** Eugene Parsons, 1903 *Alexander Hamilton* Edward Sylvester Ellis, 1899 *The China Weekly Review*, 1927 **Border-crossing in Education** Joëlle Droux, Rita Hofstetter, 2018-02-02 Border crossing in Education comprises a series of case studies covering a variety of cultural areas in order to reveal the density of connections and exchanges that inform educational practices policies and systems It attaches particular importance to individual and collective actors that govern these flows initiating promoting or reconfiguring transfers of policy models The contributors explore various aspects of the circulatory mechanisms that have been deployed in the field of education during the modern and contemporary period Varying the observation scales from

local to international they demonstrate the multilateral character of the circulatory dynamics observed The implementation of rich and varied approaches to these complex processes offers a perspective that complements and renews our knowledge of the genesis and evolution of educational policies and systems most notably highlighting their foreign inspirations However these studies do not merely evoke borrowings and hybridization as if national borders proved porous or non existent Instead they show that the phenomena of resistance reinterpretation and rejection are also an integral part of transnational mechanisms of exchanges The book thus demonstrates the relevance of a historical approach in addressing these transnational mechanisms in the field of education and childhood policy This book was originally published as a special issue of *Paedagogica Historica* Report of the Librarian and Annual Supplement to the General Catalogue State Library of Massachusetts,1885 **Millard's Review of the Far East** ,1927 Vol 34 includes Special tariff conference issue Nov 6 1925 *The Periodical* ,1919 *New American Supplement to the Latest Edition of the Encyclopædia Britannica* ,1898 *The Law School Buzz Book* Vault Editors,2006-02-07 In this new edition Vault publishes the entire surveys of current students and alumni at more than 100 top law schools Each 4 to 5 page entry is composed of insider comments from students and alumni as well as the school s responses to the comments **Melancholies of Knowledge** Margery Arent Safir,Stephen Jay Gould,1999-01-07 Scholars in the exact and social sciences join literary critics to consider the work of French author Michel Rio and to reflect on literature s place in intellectual discourse in an age dominated by science **The Publishers Weekly** ,1884 **The College Conversation** Eric J.
