researchers involved in the connection between cognitive science and the learning of a well defined domain such as electricity So during the workshop people doing research in physics education cognitive psychology and artificial intelligence had the opportunity to discuss and exchange These proceedings reflect the different points of view The main idea is that designing a learning environment needs the confrontation of different approaches The proceedings are organized in five parts which reflect these different aspects Electricity Manisha Nayak,2024-01-10 Great for classroom and home use Are you ready to take the ultimate quiz on electricity Have you ever wanted to know *Electricity and Magnetism* ,2005
