Warranty Data Collection and Analysis Wallace R. Blischke, M. Rezaul Karim, D. N. Prabhakar Murthy, 2011-07-28
Warranty Data Collection and Analysis deals with warranty data collection and analysis and the problems associated with these activities. The book is both a research monograph and a handbook for practitioners. As a research monograph, it unifies the literature on warranty data collection and analysis and presents the important results in an integrated manner. In the process, it highlights topics that require further research. As a handbook, it provides the essential methodology needed by practitioners involved with warranty data collection and analysis along with extensive references to further results. Models and techniques needed for proper and effective analysis of data are included together with guidelines for their use in warranty management, product improvement, and new product development. Warranty Data Collection and Analysis will be of interest to researchers, engineers, and statisticians and practitioners, engineers, applied statisticians, and managers involved with product warranty and reliability. It is also suitable for use as a reference text for graduate-level reliability programs in engineering, applied statistics, operations research, and management.

Warranty Management and Product Manufacture D. N. Prabhakar Murthy, Wallace R. Blischke, 2006-01-27
Purchasers of manufactured goods need assurance that they will perform well over their expected life. Warranties play a vital role in this. With proper management, warranty terms provide a promise of protection in case of product failure, while warranty service can assure customer satisfaction in the event of a claim. The authors have developed Stage 3 warranty management, viewing warranties from a strategic perspective, starting with a strategy linked to technical and commercial planning from the start of product development. Warranty management aims to achieve business objectives by focusing on product performance, assurance, and customer satisfaction. The goal of warranty management guidelines are provided for achieving this goal. Written by leading experts, this book details current thinking in product manufacture. It will be a valuable guide for managers in product development, production, and marketing, as well as graduate students in business and operations management and industrial engineering.

system in which millions of drivers must drive perfectly over billions of hours behind the wheel failure on a massive scale has been the result When we neglect the central role of the motor vehicle as a dangerous consumer product the result is one of the largest human made means for physically assaulting human beings It is time for Canadians to embrace internationally recognized ways of thinking and enter an era in which the motor vehicle by product of human carnage is relegated to history No Accident examines problems related to road safety and makes recommendations for the way forward Topics include types of drivers human related driving errors related to fatigue speed alcohol and distraction and roads pedestrians cyclists and public transit road engineering motor vehicle regulation auto safety design and collision avoidance technologies such as radar and camera based sensors on vehicles that prevent crashes This multi disciplinary study demystifies the world of road safety and provides a road map for the next twenty years

Lemon-Aid New and Used Cars and Trucks 2007-2017 Phil Edmonston,2017-03-11 Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car and truck book on the market Dr Phil along with George Iny and the Editors of the Automobile Protection Association pull no punches

Preferential Voting and Applications: Approaches Based on Data Envelopment Analysis Mehdi Soltanifar,Hamid Sharafi,Farhad Hosseinzadeh Lotfi,Witold Pedrycz,Tofigh Allahviranloo,2023-05-19 This book presents the theory and application of the models presented in this regard and establishes a meaningful relationship between data envelopment analysis and multi attribute decision making The issue of choice using the aggregation of voters votes is one of the most important group decision making issues that are always considered by decision makers in electoral systems Voting is a method of group decision making in a democratic society that expresses the will of the majority Voting is perhaps the simplest way to gather the opinions of experts and this ease of application has made it a multi attribute decision making method in group decisions Preferential voting is a type of voting that may refer to electoral systems or groups of the electoral system In preferential voting voters vote for multiple candidates and how the candidates are arranged on the ballot is important Researchers have made many efforts to provide models of voter aggregation and one of the best results of these efforts is the aggregation of votes based on the policy of data envelopment analysis Thus in group decisions the opinions of experts are obtained in a simple structure and consolidated in an interactive and logical structure and the results can be a powerful tool for decision support This book provides a complete set of voting models based on data envelopment analysis and expressing its various applications in industry and society However most decision making methods do not use the opinions of experts or reduce the motivation of experts to participate in complex interactions and time while voting methods do not have this shortcoming This book is suitable for graduate students in the fields of industrial management business management industrial engineering applied mathematics and economics It can also be a good source for researchers in decision science decision support systems data envelopment analysis supply chain management healthcare management and others The methods presented in this book can not only offer a comprehensive framework for solving the problems of these

areas but also can inspire researchers to pursue new innovative hybrid methods Lemon-Aid Used Cars and Trucks

forty five years pulls no punches Customer Retention in the Automotive Industry Michael D. Johnson, Andreas
Herrmann, Frank Huber, Anders Gustafsson, 2012-12-06 The intensely competitive global automotive industry is in the midst
of both a quality evolution and management transformation In an evolutionary fashion industry attention has progressed from
a focus on internal quality to external perceptions of customer satisfaction to subsequent customer retention and profitability
More transformational is the change in the way automotive companies operate and manage themselves An industry once
dominated at a product level by engineering and a management level by finance is becoming a cross functional customer
oriented industry Understanding the links from quality to satisfaction to retention has become a key to financial and
organizational success as the automotive industry enters the new millennium We are fortunate in this regard to have
assembled a diverse group of both academic and automotive industry contributors to offer a variety of insights into these
links After describing the ongoing changes in the automotive industry in more detail this introductory chapter describes a
framework for linking quality satisfaction and retention The framework is used to introduce each of the individual chapters
and highlight its contribution Although our primary emphasis is on the automotive industry the implications of the research
and lessons learned extend far beyond If anything the automotive industry is a prototypical competitive global industry that
faces a myriad of business issues These include among others issues pertaining to product development service development
process improvement product quality service quality supplier relationships internal customer satisfaction external customer
satisfaction retailing promotion pricing franchising and technology management
