story of the automobile manufacturer production can not be told without the story of Henry Ford who was one of the pioneers  
constructing his first horseless carriage in 1896 He incorporated the Ford Motor Company in 1903 proclaiming I will build a  
car for the great multitude As predicted he did so in 1908 offering a Model T for 950 This model heralds the beginning of the

motor age The car evolved from a former luxury item for the well to do to essential transportation for the ordinary man Ford also revolutionized automobile manufacturing in 1914 the Ford plant used innovation production techniques and was able to turn out a complete chassis every 95 minutes That was a revolution in the automobile manufacturing at the time because the former production time took about 730 minutes to turn out a complete chassis Ford achieved that fast production time by using a constantly moving assembly line subdivision of labor careful coordination of operations and he began to pay nearly double the wages offered by their competitors His innovations made him an international celebrity in the industrial revolution and he was one of the first who thought about effective organization to achieve a higher productivity Ford's methods that changed the automobile production were perhaps not mainly the introduction of the assembly line his goal was also to constantly standardizing the use of craftsmen That firstly resulted in a high product variety despite in fact that they had been made using the same drawing Secondly a lot of time was spent in fitting the parts together These facts influenced major loss in productivity and under such circumstances a real mass production was not possible But by standardizing components and developing work routines was the first scope for an assembly line approach The target of our case study is to present and analyze the changes in companies organizations applied to the example of BMW The opening part will summarize the history of the working and organizing techniques in general The middle part will focus on the changes in production organization in the automotive industry followed by the last part analyzing new strategies in Sales Marketing regarding the rebirth of MINI by the BMW Group Zusammenfassung Die vorliegende englischsprachige Projektarbeit behandelt das Thema effektive Reorganisation in Produktion Vertrieb und Marketing in der Automobilindustrie am **Small Business Health Care Problems and Long-term Care** United States.
