

Volume of Prisms & Cylinders Notes

A **prism** is a 3-dimensional shape with 2 identical polygon shaped **bases** and parallelogram shaped sides (**faces**). A prism is named according to the shape of its base.

The distance from base to base is called the **height** of the prism.

To find the the volume of a prism:

1. draw the base polygon
2. find the area of the base (B)
3. multiply the area of the base times the height of the prism

$$V = B \cdot h$$

◆ Remember in the volume formula, **B** stands for Base Area

Example: find the volume of the prism.

1. draw the base

2. find the area of the base.

3. find the volume of the prism.

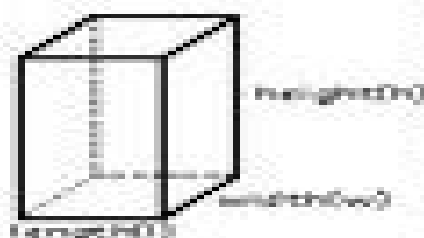

Special Prisms

Cubes and other rectangular prisms have shortcuts for finding volume.

A Cube is a rectangular prism where **all** faces are squares – the length, width, and height are all congruent.

Volume of a rectangular prism:

$$V = l \cdot w \cdot h$$

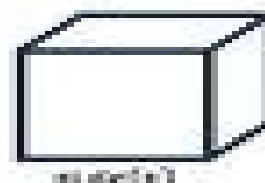

Example: find the volume

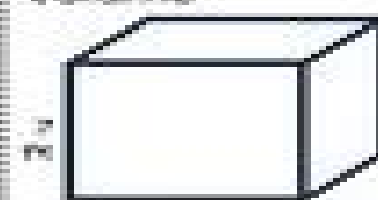

Volume of a cube:

$$V = s \cdot s \cdot s$$

Example: find the volume
