Handsfield,2015-10-01

This comprehensive textbook introduces readers to the most influential theories and models of reading and literacy ranging from behaviorism and early information processing theories to social constructionist and critical theories. Focusing on how these theories connect with different curricular approaches to literacy instruction pre K to grade 12, the author shows how they both shape and are shaped by everyday literacy practices in classrooms. Readers are invited to explore detailed vignettes that offer a practice based view of theories as they are brought to life in the classroom. Unlike other books on literacy theories, this one devotes substantial attention to linguistically and culturally diverse classrooms and 21st century technologies.

Book Features:

- Descriptions of well known curricular models and assessment approaches
- Detailed examples from specific areas of reading and literacy instruction that are prominent in today's schools
- Textbox discussions exploring histories, terminology, and debates relevant to the theories presented
- Examination of how theories and practices relate to current policy initiatives such as the Common Core State Standards
- User friendly text features such as charts, reference lists, and inset boxes to help clarify complex concepts

In these times when teachers are maligned in both the popular press and professional literature, a volume such as this offers the potential to provide intellectual freedom in the complex work of teaching. From the Foreword by Annemarie Sullivan Palincsar, University of Michigan: Finally, a text that brings together and honors multiple perspectives and makes clear the power of a good theory for making sense of our worldviews. Handsfield provides elegant demonstrations of the relations of literacy theories to actions, decisions, and practices. A must read for literacy educators and researchers. Victoria Risko, Vanderbilt University.
