Rawnsley, 2011-09 Director Zhang Yimou's film Hero released in 2002 is widely regarded as the first globally successful indigenous Chinese blockbuster touching on key questions of Chinese culture, nation and politics. This book explores the reasons for the film's popularity with its audiences and provides fascinating insights into recent developments in Chinese society, popular culture and cultural production **Killers in the Brain** Peter Day, Royal

Institution of Great Britain, 1999 This fascinating and diverse selection of essays from the Royal Institution provides a glimpse of some of the most exciting research from today's scientific community. The essays are wide-ranging, addressing topics such as the global increase in asthma and allergies, the phenomenon called El Niño and Robert Matthews' highly entertaining analysis of Murphy's Law. In addition, the book contains an informative discussion by Simon Conway Morris, author of the best-selling *Crucible of Creation*, on fossils of the Burgess Shale and the chances of other life in the Universe. Also discussed are the scientific exploration of the human voice, Big Bang, whether a place can be found in the Big Bang theory for a Creator, and neurodegenerative diseases or brain killers such as Alzheimer's and schizophrenia. These enlightening discussions and essays will appeal to a wide audience and will benefit both scientists and the general reader Through the Eyes of Serial Killers

Nadia Fezzani, 2015-03-07 Journalist Nadia Fezzani spent years probing the minds of serial killers in search of answers to unsettling questions: What went on in their heads as they prepared for their next crime? What drove them to murder, not once but habitually? Were they born killers or had they begun as normal individuals and been somehow transformed into predators? Fezzani conducted groundbreaking, uncensored interviews with multiple murderers behind bars. The account she pieces together from interviews, psychological research, criminal profiling and genetic studies is as unsettling as it is undeniable. The scars of abuse and cold-blooded logic all emerge as Fezzani dissects serial killers' personalities in a quest to understand those who have committed unthinkable crimes. *Through the Eyes of Serial Killers* explores the leading theories on the psychology of serial killing, victim selection and telling signs of potentially dangerous mental disturbance. It is hoped that a clear-headed understanding of serial killings can unlock better strategies to prevent or even predict this rarest and most evil of crimes.
