Starlight Starbright: Are Stars Conscious? Second Edition Greg Matloff, C. Bangs, 2020-05-07 The only thing we can be absolutely sure of is our own consciousness But what is consciousness Is it a property that is unique to humans or do we share it with other lifeforms Or is the philosophical doctrine of panpsychism correct are stars and the entire universe conscious in some sense Early chapters in this book examine the prehistory mythology and history of this topic Arguments are presented from the viewpoints of shamans philosophers poets quantum physicists and novelists A simple toy model of panpsychism is then presented in which a universal field of proto consciousness interacts with molecular bonds via the vacuum fluctuation pressure of the Casimir Effect It is shown how this model is in congruence with an anomaly in stellar motions called Parenago's Discontinuity Cool redder less massive stars such as the Sun apparently circle the center of the galaxy faster than their hotter bluer more massive sisters This discontinuity occurs at the point in the stellar distribution where molecules begin to appear in stellar spectra As described in the first edition of this book observations of main sequence stars out to 260 light years and giant stars out to 1 000 light years using the ESA Hipparcos space observatory support the reality and non locality of Parenago's Discontinuity Local more conventional explanations for this phenomenon are not supported by observations of

other galaxies and the spiral arms of the Milky Way Since 2014 the new ESA Gaia space observatory has been obtaining kinematics and position data for 1 billion stars in our galaxy The first Gaia data release in 2016 has been used in 2018 by a Russian team to demonstrate Parenago's Discontinuity for a large stellar sample out to 500 light years from the Sun These observations support the hypothesis that anomalous stellar motion is due to stellar migration as described by philosopher author Olaf Stapledon in his classic novel *Star Maker* as previously discussed by the author in the peer reviewed *Journal of the British Interplanetary Society JBIS* In light of the new Gaia observations and work by other researchers it is not impossible that panspsychism is emerging from the realm of philosophy as a new subdivision of observational astronomy Simple models of universal proto consciousness may be subject to inductive tests using current and future space observatories A special feature of this book is the chapter frontispiece art by C Bangs

significantly redefined The Heavens Are Telling the Glory of God probes these questions and offers possible answers Beginning with the experiences of women religious and their encounter with the New Cosmology or Universe Story this book seeks to mediate among the various perspectives and proposes how informed and reflective engagement with science tradition and theology can bridge the generational divides and foster a spirituality that is both emergent and incarnational Access to online discussion and reflection questions is included *The Hubble Wars* Eric Chaisson, 1998 Eric Chaisson the senior scientist on the HST project tells the inside story of the much heralded mission to fix the telescope Drawing on his journals Chaisson recreates the day to day struggles of those involved in the project *Evolutionary Systems* G. Vijver, Stanley N. Salthe, M. Delpo, 2013-04-17 The three well known revolutions of the past centuries the Copernican the Darwinian and the Freudian each in their own way had a deflating and mechanizing effect on the position of humans in nature They opened up a richness of disillusion earth acquired a more modest place in the universe the human body and mind became products of a long material evolutionary history and human reason instead of being the central immaterial locus of understanding was admitted into the theater of discourse only as a materialized and frequently out of control actor Is there something objectionable to this picture Formulated as such probably not Why should we resist the idea that we are in certain ways and to some degree physically biologically or psychically determined Why refuse to acknowledge the fact that we are materially situated in an ever evolving world Why deny that the ways of inscription traces of past events and processes are co determinative of further evolutionary pathways Why minimize the idea that each intervention of each natural being is temporally and materially situated and has as such the inevitable consequence of changing the world The point is however that there are many more or less radically different ways to consider the mechanization of man and nature There are in particular many ways to get the message of material and evolutionary determination as well as many levels at which this determination can be thought of as relevant or irrelevant
