## Charging Your Batteries

If you intend to use battery power, be sure to fully charge your battery pack before going on long trips. Remember that the power adapter charges the battery pack as long as it is plugged into the computer and an AC power source. Be aware that it takes much longer to charge the battery pack when the Eee Pad is on use.

Remember to fully charge the battery 18 hours or more before first use and whenever it is depleted to prolong battery life. The battery reaches its maximum capacity after a few full charging and discharging cycles.

## Airplane Precautions

Ask an airline personnel if you want to use your Eee Pad onboard an aircraft. Most airlines have restrictions for using electronic devices. Most airlines allow electronic use only between and not during takeoffs and landings.

There are three main types of airport security devices: X-ray machines used on items placed on conveyor belts, magnetic detectors used on people walking through security checks, and magnetic wand hand-held devices used on people or individual items. You can send your Eee Pad through airport X-ray machines, but do not send your Eee Pad through airport magnetic detectors or expose it to magnetic wands.
