Pluralism and Law A. Soeteman, 2013-04-17 AREND SOETEMAN In the past we lived on one earth but in many different worlds Different civilisations in regions far apart knew about one another at least from about the 16th century they competed with one another or tried to dominate the other they influenced one another but in many important aspects they were independent from one another Somewhere in the 20th century however this changed There is no far apart anymore We have lived through two European wars which developed into world wars Modern aeroplanes allow us to travel in only a couple of hours around the world Instant communication between individuals who have the whole globe in between is a reality There still exist great differences between different civilisations But they can ignore one another only at their peril They deeply influence one another Today therefore we live in one world Conflicts in the Middle East in Rwanda and Uganda or in the former Yugoslavia have their impact all over the world Violations of human rights no matter where are increasingly considered to be the concern of all of us The whims and caprices of some dictator may influence the spending possibilities of the general public far away

International Business Transactions Fundamentals Ronald A. Brand, 2018-11-27 Designed primarily as a casebook and text for law school study this volume

represents nearly four decades of work by the author to present the fundamentals of the law of international business transactions. The second edition refines and updates the materials in the first edition in a manner intended to be useful not only to students but as a desk book for practitioners. Like the first edition, this second edition focuses on the role of lawyers in identifying risks inherent in cross border economic transactions and then using primarily the law and negotiations to eliminate where possible, reduce where practicable, and reallocate where necessary those risks to the benefit of the client. Matters covered include the basic export import sales contract, the use of price delivery terms to allocate both price and risk, the application and use of the United Nations Sales Convention (CISG), events which may excuse the nonperformance of a contract obligation, when and how to opt in or out of the CISG, financing the export sale with a commercial letter of credit, a basic understanding of the WTO trade regulation system, the regulation of importation including tariff classification and valuation, the regulation of exportation including licensing and extraterritorial application of export laws, U.S. and EU Rules affecting the professional liability of international transactions lawyers, planning for the resolution of disputes in international transactions, a comparative law understanding, jurisdiction, applicable law, and judgments recognition issues affecting choices between arbitration and litigation of disputes, drafting choice of forum clauses, drafting choice of law clauses, understanding rules regarding judgments, obligations stated in foreign currencies, recent multilateral efforts to harmonize the law on jurisdiction and judgments recognition, dealing with and avoiding claims of sovereign immunity, and act of state operating abroad through employees, agents, and distributors, anti bribery laws, and the need for compliance programs, and contract restrictions, expropriation, political risk, and how to use insurance and contract terms to deal with them, investor state contracts, antitrust laws, and their extraterritorial application. Each chapter is designed to help the reader move from the simple cross border sales transaction through steps which increase both activity abroad and the laws and regulations that may bring with them additional risks to be identified and allocated. A separate documents volume provides virtually all current primary source material on the law of international business transactions. There are many guides to the conduct of international business transactions, but none organized as clearly as this. With this up to date edition of a well established practical guide in house lawyers for multinational corporations and practitioners in business law will quickly develop a framework for understanding each source of protection and enhance their ability to serve their company and clients well.

The Ethics of Internet Research Heidi A. McKee, James E. Porter, 2009. Drawing from interviews with Internet researchers from across the globe who work in diverse disciplines and in a wide array of online venues, this book examines ethical issues and questions that Internet researchers may encounter throughout the research process. Although the ethics of Internet research are complex, the aim of the book is to provide a rhetorical case based process to aid researchers in ethical decision making. In doing so, the book provides Internet researchers with useful resources and heuristics for engaging in ethical practices, interactions, and problem solving for their research.
