their daily practices It also analyses specifically the geographies of those practices how what people do affects the environment but in different ways across time and space and at different scales aspects of practices that are neglected in the literature With an interdisciplinary perspective this book will be of interest to students and scholars in geography sociology science and technology studies political science and anthropology It is written in an accessible and readable style so as to be useful for preliminary and more advanced courses in environmental management perception and policy as well as in studies of modern society consumption and environmentalism

*Plug-in Vehicles, Plugged in Policy?* Great Britain: Parliament: House of Commons: Transport Committee, 2012-09-20 Consumer demand for plug in vehicles remains very low and the Government grant to encourage demand may not be proving effective The Government must do more to show that its plug in vehicle strategy is a good use of public money Carbon emissions from transport must be reduced if the UK is to meet its climate change targets but public money must be targeted on effective policies So far Department for Transport expenditure on plug in cars some 11 million has benefited just a handful of motorists There is a risk that the Government is basically subsidising second cars for affluent households It is also unclear whether the provision of public charging infrastructure encourages demand for plug in cars Indeed the Government does not even have a register of all the chargepoints installed at public expense
