complementary potential which exists between complementary and conventional western medicine It provides students
teachers and practitioners with a framework within which they can effectively analyse and classify the extensive amount of
information gathered in a CAM consultation and help them develop effective and appropriate treatment programmes within
the time constraints of a busy clinic It provides an insight into the initial CAM consultation process offering possible
treatment and collaborative referral options for individual cases rather than dictating diagnostic analysis or treatment
protocols for specific conditions Question suggestions have been provided to help the user collect the necessary information
to develop a working diagnosis and treatment protocol for each individual case Readers can then adapt questions decision
making tools and therapeutic recommendations to suit the needs of their own clients Complementary practitioners are often
uncertain about the legal and ethical boundaries regarding diagnosis and case management This book will help CAM
students and practitioners recognise situations requiring referral understand their role in collaborative case management
and confidently integrate a range of CAM modalities in treatment programmes Provides a clear case analysis format which
can be and adapted to suit the requirements of individual case histories Specific questioning format Clearly identifies
situations where cross or collaborative referral is necessary Decision tables help readers prioritise treatment refer
appropriately and help guide clinical thinking when readers are faced with several treatment options Class tested curriculum
