Calder, 2019-04-30 A Eurasian transformation is underway and it flows from China With a geopolitically central location the country's domestic and international policies are poised to change the face of global affairs The Belt and Road Initiative has called attention to a deepening Eurasian continentalism that has argues Kent Calder much more significant implications than

have yet been recognized In Super Continent Calder presents a theoretically guided and empirically grounded explanation for these changes He shows that key inflection points beginning with the Four Modernizations and the collapse of the Soviet Union and culminating in China's response to the Global Financial Crisis and Crimea's annexation are triggering tectonic shifts Furthermore understanding China's emerging regional and global roles involves comprehending two ongoing transformations within China and across Eurasia as a whole and that the two are profoundly interrelated Calder underlines that the geo economic logic that prevailed across Eurasia before Columbus and that made the Silk Road a central thoroughfare of world affairs for close to two millennia is reasserting itself once again Technical Abstract Bulletin ,1979
