10 Ontario Building Code Building Guide:

Evaluation of Fire Flow Methodologies Matthew E. Benfer, Joseph L. Scheffey, 2015-08-08 This SpringerBrief offers careful assessments of the appropriateness and effectiveness of currently available methodologies for fire flow. It explains the water supply requirements for firefighting including rate of flow, the residual pressure required at that flow and the duration that is necessary to control a major fire in a specific structure. First reviewing existing fire flow calculation methodologies in the U S and globally, the authors determine the new information necessary to validate the existing fire flow calculation methodologies. After identifying 19 methods from the U S, UK, France, Germany, the Netherlands, New England and Canada, two types of methods are evaluated: those for building planning based on fire and building code requirements and those for on scene fire service use. Building planning methods are also examined, including an explanation of the range of building variables that determine fire flow. A survey form for fire departments is provided to help fire departments identify key predictive features based on construction and building parameters. Researchers and professionals in fire engineering will find the recommendations in *Evaluation of Fire Flow Methodologies* valuable. Site Planning Guidelines for Medium Density Housing Ontario. Ministry of Housing, 1980

Booze, Cigarettes, and Constitutional Dust-Ups Ryan Manucha, 2022-10-15 Gerard Comeau, a retiree living in rural New Brunswick, never thought his booze run would turn him into a Canadian hero. In 2012, after Comeau had driven to Quebec to purchase cheaper beer and crossed back into his home province, police officers participating in a low stakes sting operation tailed and detained him, confiscated his haul and levied a fine of less than 300. Countries routinely engage in trade wars and erect barriers to protect domestic industries from foreign competition. Comeau, however, was detained by the full force of the law for engaging in commerce with a Canadian business on the other side of a domestic border. With Comeau's story as its starting point, *Booze, Cigarettes, and Constitutional Dust-Ups* tells the fascinating tale of Canadian interprovincial trade. Ryan Manucha examines the historical, political and legal forces that gave rise to the regulation of interprovincial commerce in Canada, the trade offs that come with liberalized domestic free trade and Canada's enduring pursuit of economic union. The pandemic laid bare the vulnerability of global supply chains, the fickleness of foreign trading partners and the surprising slipperiness of domestic trade. In a global climate of increasingly isolationist geopolitics, the history and possibility of Canada's economic union, quirks and all, deserve careful attention.
