The 2014 midterm election was one of the most significant in recent memory with a decisive turning of the tables in favor of Republicans With a now Republican controlled Senate and House at odds with a Democratic president with only two years left in office the fault lines within and between both parties have never been more tenuous In this book prominent elections scholar and political commentator Larry J Sabato brings together respected journalists and experts from across the political spectrum to examine every facet of the midterm election results and the implications for the 2016 election cycle In frank accessible prose each author offers insight that goes beyond the headlines to analyze what the midterm results mean and what is at stake in the coming presidential race Contributing authors joining Larry Sabato with chapters in the book include Professor Alan Abramovitz of Emory University Mark Blumenthal of Huffington Post Jamelle Bouie of Slate Rhodes Cook formerly of Congressional Quarterly Robert Costa of the Washington Post Ariel Edwards Levy of Huffington Post James Hohmann of Politico political writers and commentators Kyle Kondik and Geoff Skelley of the University of Virginia Center for Politics Jill Lawrence of Creators Syndicate Visiting Assistant Professor Josh Putnam of Appalachian State University Michael Toner and Karen Trainer of Wiley Rein LLP and Sean Trende of RealClearPolitics      Scribal Tools in Ancient Israel Philip Zhakevich,2020-12-15 In this book Philip Zhakevich examines the technology of writing as it existed in the southern Levant during the Iron Age II period after the alphabetic writing system had fully taken root in the region Using the Hebrew Bible as its corpus and focusing on a set of Hebrew terms that designated writing surfaces and instruments this study

synthesizes the semantic data of the Bible with the archeological and art historical evidence for writing in ancient Israel. The bulk of this work comprises an in depth lexicographical analysis of Biblical Hebrew terms related to Israel's writing technology. Employing comparative Semitics, lexical semantics and archaeology, Zhakevich provides a thorough analysis of the origins of the relevant terms, their use in the biblical text, Ben Sira, the Dead Sea Scrolls and ancient Hebrew inscriptions and their translation in the Septuagint and other ancient versions. The final chapter evaluates Israel's writing practices in light of those of the ancient world, concluding that Israel's most common form of writing, i.e. writing with ink on ostraca and papyrus, is Egyptian in origin and was introduced into Canaan during the New Kingdom. Comprehensive and original in its scope, *Scribal Tools in Ancient Israel* is a landmark contribution to our knowledge of scribes and scribal practices in ancient Israel. Students and scholars interested in language and literacy in the first millennium Levant, in particular, will profit from this volume.

**Word Frequencies in Written and Spoken English** Geoffrey Leech, Paul Rayson, Andrew Wilson, 2014-06-11

Word Frequencies in Written and Spoken English is a landmark volume in the development of vocabulary frequency studies. Whereas previous books have in general given frequency information about the written language only, this book provides information on both speech and writing. It not only gives information about the language as a whole but also about the differences between spoken and written English and between different spoken and written varieties of the language. The frequencies are derived from a wide ranging and up to date corpus of English, the British National Corpus, which was compiled from over 4,000 written texts and spoken transcriptions representing the present day language in the UK. The book is based on a new version of the corpus available from 2001, providing more accurate grammatical information which is essential, for example, for distinguishing words like *leaves* (noun) and *leaves* (verb) with different meanings. The book begins with a general introduction explaining why such information is important and highlighting interesting linguistic findings that emerge from the statistical analysis of the British National Corpus vocabulary. It also contains twenty-four interest boxes which highlight and comment on different aspects of frequency, for example, the most common colour words in English, in order of frequency, and a comparison of male words (e.g. *man*) and female words (e.g. *woman*) in terms of their frequency.
