Lemon-Aid Used Cars and Trucks 2012-2013 Phil Edmonston, 2012-05-19 Lemon Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car and truck books on the market. U.S. automakers are suddenly awash in profits and South Koreans and Europeans have gained market shares while Honda, Nissan and Toyota have curtailed production following the 2011 tsunami in Japan. It argues that the concentration of FDI in the Chinese manufacturing economy since the beginning of this century is largely the result of China's entrepreneurial urban growth strategy which was in turn motivated by the overall political and fiscal structures of China and was facilitated by urban land use under the manipulation of municipalities. By identifying the interactions between cross border capital flow, national regulations and local responses

this book not only provides a fresh understanding of China's FDI pattern from an urban perspective that has been rare among publications on similar topics but also sheds light on the drivers underlying China's rapid economic growth and its implications for sustainable development. It also stands as a useful reference for other countries and regions that plan to launch their own state-led development projects.

The buyer needs to know what to look for and what to watch out for above and beyond the ordinary considerations of buying a vehicle. And for the seller descriptions photos and most other details are much more involved than when selling other ordinary items on eBay.
