

Introduction

Warning symbols on your vehicle

When you see this symbol, it is imperative that you consult the relevant section of this guide before touching or attempting adjustment of any kind.

Protecting the environment

We must all play our part in protecting the environment. Correct vehicle usage and the authorized disposal of waste, cleaning and lubrication materials are significant steps towards this aim. Information in this respect is highlighted in this guide with the tree symbol.

BREAKING-IN YOUR VEHICLE

Your vehicle does not need an extensive break-in. Try not to drive continuously at the same speed for the first 1,000 miles (1,600 km) of new vehicle operation. Vary your speed frequently in order to give the moving parts a chance to break in.

Do not add friction modifier compounds or special break-in oils during the first few thousand miles (kilometers) of operation, since these additives may prevent piston ring seating. See *Engine oil* in the *Maintenance and Specifications* chapter for more information on oil usage.

SPECIAL NOTICES

For a detailed description of what is covered and what is not covered by your vehicle's New Vehicle Limited Warranty, refer to the *Warranty Guide* that is provided to you along with your *Owner's Guide*.

Please read the section *Supplemental restraint system (SRS)* in the *Seating and Safety Restraints* chapter. Failure to follow the specific warnings and instructions could result in personal injury.

Features contributions by persons who have extensive experience in HFE and who have served professionally in the role of an expert witness in various legal cases mostly in product liability. Gives a broad range of situations to illustrate where HFE considerations could improve product or environmental safety. There is an emphasis on children caregivers and adult activities such as driving. Uses mitigation strategies to reduce the likelihood of occurrence and severity of adverse events. Includes a first person scenario at the beginning of each chapter. Allows the lessons learned to be adaptable to other domains where people interact with products and environments.

Narrow Tilting Vehicles Chen Tang, Amir Khajepour, 2019-07-08

To resolve the urban transportation challenges like congestion parking fuel consumption and pollution narrow urban vehicles which are small in footprint and light in their gross weight are proposed. Apart from the narrow cabin design these vehicles are featured by their active tilting system which automatically tilts the cabin like a motorcycle during the cornering for comfort and safety improvements. Such vehicles have been manufactured and utilized in city commuter programs. However there is no book that systematically discusses the mechanism dynamics and control of narrow tilting vehicles (NTVs). In this book motivations for building NTVs and various tilting mechanisms designs are reviewed followed by the study of their dynamics. Finally control algorithms designed to fully utilize the potential of tilting mechanisms in narrow vehicles are discussed. Special attention is paid to an efficient use of the control energy for rollover mitigation which greatly enhance the stability of NTVs with optimized operational costs.
