Encyclopedia of London's East End Kevin A. Morrison, 2023-03-06 The East End is an iconic area of London from the transient street art of Banksy and Pablo Delgado to the exhibitions of Doreen Fletcher and Gilbert and George Located east of the Tower of London and north of the River Thames it has experienced a number of developmental stages in its four hundred year history Originating as a series of

scattered villages the area has been home to Europe's worst slums and served as an affluent nodal point of the British Empire. Through its evolution the East End has been the birthplace of radical political and social movements and the social center for a variety of diasporic communities. This reference work with its alphabetically organized cross-referenced entries and its original and historical photography serves as a comprehensive guide to the social and cultural history of this global hub.

Understanding and Applying Medical Anthropology Peter J. Brown, Svea Closser, 2016-07. The editors of the third edition of the seminal textbook *Understanding and Applying Medical Anthropology* bring it completely up to date for both instructors and students. The collection of 49 readings, 17 of them new to this edition, offers extensive background description and exposes students to the breadth of theoretical, methodological, and practical perspectives and issues in the field of medical anthropology. The text provides specific examples and case studies of research as it is applied to a range of health settings from cross-cultural clinical encounters to cultural analysis of new biomedical technologies and the implementation of programs in global health settings. The new edition features a major revision that eliminates many older readings in favor of more fresh relevant selections, a new section on structural violence that looks at the impact of poverty and other forms of social marginalization on health, an updated and expanded section on Conceptual Tools including new research and ideas that are currently driving the field of medical anthropology forward such as epigenetics and syndemics, new chapters on climate change, Ebola, PTSD among Iraq/Afghanistan veterans, eating disorders, and autism, among others, recent articles from Margaret Mead Award winners Sera Young, Seth Holmes, and Erin Finley, along with new articles by such established medical anthropologists as Paul Farmer and Merrill Singer.

The Protection of Non-Combatants During Armed Conflict and Safeguarding the Rights of Victims in Post-Conflict Society Philipp Ambach, Frédéric Bostedt, Grant Dawson, Steve Kostas, 2015-05-19. This collection of essays written by friends and colleagues of Joakim Dungal focuses on the protection of the innocent during and after war. It is a tribute to Joakim's life and work. Joakim made a significant contribution to international justice and the rule of law through his service to the United Nations International Criminal Tribunals for the former Yugoslavia and Rwanda, the Special Court for Sierra Leone, the Temporary International Presence in Hebron, and the United Nations Assistance Mission in Afghanistan. He was also a prolific author and published scholarly works on a wide range of issues including command responsibility, national security interests, the right to humanitarian assistance during internal armed conflicts, and crimes against humanity. This book continues Joakim's work with in-depth analyses of a variety of issues arising under modern conflict such as the application of international humanitarian law and international human rights law to aerial drone attacks, targeted sanctions, and reparations to victims. Joakim understood these complex and interlinked issues and dedicated his professional life to engaging with them. Through his work and his scholarship, he demonstrated the crucial importance of adopting victim-centred approaches to dealing with the consequences of armed conflict and to its prevention. This was also why he chose to work for the United Nations as a human rights officer in

Afghanistan This book attempts to honour and affirm Joakim's choice **American Democracy** Andrew J. Perrin, 2014-04-10 In this groundbreaking book sociologist Andrew Perrin shows that rules and institutions while important are not the core of democracy Instead as Alexis de Tocqueville showed in the early years of the American republic democracy is first and foremost a matter of culture the shared ideas practices and technologies that help individuals combine into publics and achieve representation Reinterpreting democracy as culture reveals the ways the media public opinion polling and changing technologies shape democracy and citizenship As Perrin shows the founders of the United States produced a social cultural and legal environment fertile for democratic development and in the two centuries since citizens and publics use that environment and shared culture to re imagine and extend that democracy American Democracy provides a fresh innovative approach to democracy that will change the way readers understand their roles as citizens and participants Never will you enter a voting booth or answer a poll again without realizing what a truly social act it is This will be necessary reading for scholars students and the public seeking to understand the challenges and opportunities for democratic citizenship from Toqueville to town halls to Twitter Regional Politics in Oceania Stephanie Lawson, 2024-02-22 The most comprehensive study of regional politics in Oceania produced to date Drawing on a range of interdisciplinary sources and providing a systematic account of major issues facing the region this book will appeal to anyone engaged in any aspect of regional studies in Oceania and beyond *The Normative Order of the Internet* Matthias C. Kettemann, 2020-07-28 There is order on the internet but how has this order emerged and what challenges will threaten and shape its future This study shows how a legitimate order of norms has emerged online through both national and international legal systems It establishes the emergence of a normative order of the internet an order which explains and justifies processes of online rule and regulation This order integrates norms at three different levels regional national international of two types privately and publicly authored and of different character from ius cogens to technical standards Matthias C Kettemann assesses their internal coherence their consonance with other order norms and their consistency with the order's finality The normative order of the internet is based on and produces a liquefied system characterized by self learning normativity In light of the importance of the socio communicative online space this is a book for anyone interested in understanding the contemporary development of the internet This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is offered as a free PDF download from OUP and selected open access locations *Asia's Security* Robert Ayson, 2015-09-29 Security threats in Asia fast become issues for the rest of the world This introductory and wide ranging text on the subject takes a thematic approach to assess how localized security issues from territorial rivalry to the rise of China materialize as ripple effects across the whole region Transitive Cultures Christopher B. Patterson, 2018-04-02 Texts written by Southeast Asian migrants have often been read taught and studied under the label of multicultural literature But what if the ideology of multiculturalism with its emphasis on authenticity and identifiable cultural difference is precisely what

this literature resists Transitive Cultures offers a new perspective on transpacific Anglophone literature revealing how these chameleonic writers enact a variety of hybrid transnational identities and intimacies Examining literature from Malaysia Singapore and the Philippines as well as from Southeast Asian migrants in Canada Hawaii and the U S mainland this book considers how these authors use English strategically as a means for building interethnic alliances and critiquing ruling power structures in both Southeast Asia and North America Uncovering a wealth of texts from queer migrants those who resist ethnic stereotypes and those who feel few ties to their ostensible homelands Transitive Cultures challenges conventional expectations regarding diaspora and minority writers

**Routledge Handbook on the Green New Deal** Kyla Tienhaara, Joanna Robinson, 2022-08-26 In recent years the Green New Deal has moved from relative obscurity to front and centre of policy discussions and public debates about how to respond to the climate crisis It has been credited with radically changing the nature of the conversation on climate change and with re energizing the environmental movement at a critical time All Green New Deal proposals share an emphasis on the need for governments rather than markets to lead the energy transition However they differ in other respects This Handbook analyses the fundamentals underlying all Green New Deals as well as exploring national and regional variations It is divided into three parts The first part examines the political economy of the Green New Deal focussing not just on how proposals will be costed but also on opportunities for a fundamental transformation of both national economies and the global economic system The second part explores issues of justice which are central to many Green New Deal proposals including Indigenous rights racial and gender equity and justice for the Global South In the third part authors detail case studies of Green New Deal proposals and plans at the local national and regional level This book will be an invaluable research and reference volume for students and scholars in economics politics sociology geography and environmental studies It should also be of interest to those actively involved in climate and environmental policymaking
