**Health Inequalities** Katherine E. Smith, Clare Bambra, Sarah E. Hill, 2015-11-26 Informed by a wealth of available research between 1997 and 2010 the UK Labour government introduced a raft of policies to reduce health inequalities Despite this by most measures the UK's health inequalities have continued to widen This failure has prompted calls for new approaches to health inequalities research and some consensus that public health researchers ought to be more actively involved in public health advocacy Yet there is currently no agreement as to what these new research agendas should be and despite multiple commentaries reflecting on recent UK efforts to reduce health inequalities there has so far been little attempt to map future directions for research or to examine what more egalitarian policies means in practical terms *Health Inequalities Critical Perspectives* addresses these concerns It takes stock of the UK's experiences of

health inequalities research and policy to date reflecting on the lessons that have been learnt from these experiences both within the UK and internationally The book identifies emergent research and policy topics exploring the perspectives of actors working in a range of professional settings on these agendas Finally the book considers potential ways of improving the links between health inequalities research policy and practice including via advocacy With contributions from established international health inequalities experts and newer up and coming researchers in the field as well as individuals working on health inequalities in policy practice and civil society settings *Health Inequalities Critical Perspectives* is a must buy for researchers postgraduate students policymakers practitioners and research funders *Textbook Culture* Pooja

Bhalla,2024-06-14 This volume captures the essence of schooling in a structural manner and explores the classroom life in the larger schooling context The emphasis is to uncover the necessary framework of classroom that is significant to understand the place of textbooks in the Indian school education system By the use of ethnographic vignettes it brings out the multiple patterns of teacher student s interactions as they occur in different textbook based situations Through this it sheds light on the primacy of the textbook approach in the classroom processes The book also investigates the ways through which the students respond to the different pedagogic situations In doing so it explores the notions of student boredom alienation inclusion and exclusion and the array of student textbook experiences that are pivotal to the shape and reshape the classroom processes in the larger pedagogical discourses This book will be of interest to researchers students and teachers of education studies sociology and politics of education teacher education childhood and youth studies and urban studies It will also be useful for education policymakers and professionals in the development sector **Disasters** Kathleen Tierney,2019-05-20 Disasters kill maim and generate increasingly large economic losses But they do not wreak their damage equally across populations and every disaster has social dimensions at its very core This important book sheds light on the social conditions and on the global national and local processes that produce disasters Topics covered include the social roots of disaster vulnerability exposure to natural hazards such as hurricanes and tsunamis as a form of environmental injustice and emerging threats Written by a leading expert in the field this book provides the necessary frameworks for understanding hazards and disasters exploring the contributions of very different social science fields to disaster research and showing how these ideas have evolved over time Bringing the social aspects of recent devastating disasters to the forefront Tierney discusses the challenges of conducting research in the aftermath of disasters and critiques the concept of disaster resilience which has come to be seen as a key to disaster risk reduction Peppered with case studies research examples and insights from very different disciplines this rich introduction is an invaluable resource to students and scholars interested in the social nature of disasters and their relation to broader social forces *Understanding Society and Natural Resources* Michael J. Manfredo,Jerry J. Vaske,Andreas Rechkemmer,Esther A. Duke,2014-06-11 In this edited open access book leading scholars from different disciplinary backgrounds wrestle with social science integration opportunities and challenges This

book explores the growing concern of how best to achieve effective integration of the social science disciplines as a means for furthering natural resource social science and environmental problem solving The chapters provide an overview of the history vision advances examples and methods that could lead to integration The quest for integration among the social sciences is not new Some argue that the social sciences have lagged in their advancements and contributions to society due to their inability to address integration related issues Integration merits debate for a number of reasons First natural resource issues are complex and are affected by multiple proximate driving social factors Single disciplinary studies focused at one level are unlikely to provide explanations that represent this complexity and are limited in their ability to inform policy recommendations Complex problems are best explored across disciplines that examine social ecological phenomenon from different scales Second multi disciplinary initiatives such as those with physical and biological scientists are necessary to understand the scope of the social sciences Too frequently there is a belief that one social scientist on a multi disciplinary team provides adequate social science representation Third more complete models of human behavior will be achieved through a synthesis of diverse social science perspectives

**Cyclescapes of the Unequal City** John G. Stehlin, 2019-10-01  
A critical look at the political economy of urban bicycle infrastructure in the United States Not long ago bicycling in the city was considered a radical statement or a last resort and few cyclists braved the inhospitable streets of most American cities Today however the urban cyclist represents progress and the urban renaissance City leaders now undertake ambitious new bicycle infrastructure plans and bike share schemes to promote the environmental social and economic health of the city and its residents Cyclescapes of the Unequal City contextualizes and critically examines this new wave of bicycling in American cities exploring how bicycle infrastructure planning has become a key symbol of and site of conflict over uneven urban development John G Stehlin traces bicycling s rise in popularity as a key policy solution for American cities facing the environmental economic and social contradictions of the previous century of sprawl Using in depth case studies from San Francisco Philadelphia and Detroit he argues that the mission of bicycle advocacy has converged with and reshaped the urban growth machine around a model of livable environmentally friendly and innovation based urban capitalism While advocates envision a more sustainable city for all the deployment of bicycle infrastructure within the framework of the neoliberal city in many ways intensifies divisions along lines of race class and space Cyclescapes of the Unequal City speaks to a growing interest in bicycling as an urban economic and environmental strategy its role in the politics of gentrification and efforts to build more diverse coalitions of bicycle advocates Grounding its analysis in both regional political economy and neighborhood based ethnography this book ultimately uses the bicycle as a lens to view major shifts in today s American city

**The Origins of the Modern World** Robert B. Marks, 2024-01-02 This clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present Unlike most studies which assume that the rise of the West is the story of the coming of the modern world this history drawing upon new scholarship on Asia Africa and the New World and upon the maturing field of environmental history constructs a story in which those parts of the world play major roles including their impacts on the environment Robert B Marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world increasing inequality within the wealthiest industrialized countries and an escape from the environmental constraints of the biological old regime He explains its origins by emphasizing contingencies such as the conquest of the New World the broad comparability of the most advanced regions in China India and Europe the reasons why England was able to escape from common ecological constraints facing all of those regions by the end of the eighteenth century a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world the mounting environmental crisis that defines the modern world and the ways in

which the forces of globalization stress the economic and political underpinnings of the modern world Now in a new edition that brings the saga of the modern world to the present in an environmental context the book considers how and why the United States emerged as a world power in the twentieth century and became the sole superpower by the twenty first century and why the changed relationship of humans to the environment likely will be the hallmark of the modern era the Anthropocene Once again arguing that the US rise to global hegemon was contingent not inevitable Marks also points to the resurgence of Asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years Posthuman Glossary Rosi Braidotti, Maria

Hlavajova, 2018-02-22 If art science and the humanities have shared one thing it was their common engagement with constructions and representations of the human Under the pressure of new contemporary concerns however we are experiencing a posthuman condition the combination of new developments such as the neoliberal economics of global capitalism migration technological advances environmental destruction on a mass scale the perpetual war on terror and extensive security systems with a troublesome reiteration of old unresolved problems that mean the concept of the human as we had previously known it has undergone dramatic transformations The Posthuman Glossary is a volume providing an outline of the critical terms of posthumanity in present day artistic and intellectual work It builds on the broad thematic topics of Anthropocene Capitalocene eco sophies digital activism algorithmic cultures and security and the inhuman It outlines potential artistic intellectual and activist itineraries of working through the complex reality of the posthuman condition and creates an understanding of the altered meanings of art vis vis critical present day developments It bridges missing links across disciplines terminologies constituencies and critical communities This original work will unlock the terms of the posthuman for students and researchers alike *Diversity of Belonging in Europe* Susannah Eckersley, Claske Vos, 2022-12-27 *Diversity of Belonging in Europe* analyzes conflicting notions of identity and belonging in contemporary Europe Addressing the creation negotiation and re use of diverse spaces and places of belonging the book examines their fascinating complexities in the context of a changing Europe Taking an innovative interdisciplinary approach the volume examines renegotiations of belonging played out through cultural encounters with difference and change in diverse public spaces and contested places Highlighting the interconnections between social change and culture heritage and memory the chapters analyze multilayered public spaces and the negotiations over culture and belonging that are connected to them Through analyses of diverse case studies the editors and authors draw out the significance of the participation or exclusion of differing community grassroots and activist groups in such practices and discourses of belonging in relation to the contemporary emergence of identity conflicts and political uses of the past across Europe They analyze the ways in which people's sense of belonging is connected to cultural heritage and memory practices undertaken in different public spaces including museums cultural and community centres city monuments and built heritage neglected urban spaces and online

**Handbook of Research on Strategic Retailing of Private Label Products in a Recovering Economy** Gómez-Suárez, Mónica, Martínez-Ruiz, María Pilar, 2016-06-20 As the global market continues to recuperate from economic downfall it is essential for private label products to find ways to compete with alternatives offered by wholesale and national retailers In many cases it becomes difficult for off brand products to generate market appeal when consumers have preconceived notions about the quality of generic products and loyalty to branded products The Handbook of Research on Strategic Retailing of Private Label Products in a Recovering Economy emphasizes advertising and promotional approaches being utilized as well as consumer behavior and satisfaction in response to marketing strategies and the sensitive pricing techniques being implemented to endorse generic and store brand products available on the market Highlighting brand competition between wholesalers retailers and private brand names following a global economic crisis this publication is an extensive resource for researchers graduate students economists and business professionals

**Spatial Transformation** Milad Abassiharofteh, Jessica Baier, Angelina Göb, Insa Thimm, Andreas Eberth, Falco Knaps, Vilja Larjosto, Fabiana Zebner, 2022 What can be understood by spatial transformation how does it manifest itself and what are the characteristics of transformation processes This Research Report addresses these questions and presents current research projects and approaches from an academic and practical planning perspective A central point of reference is the concept of a Great Transformation which stems from an expert report by the German Advisory Council on Global Change WBGU It outlines the profound changes in the economy and society towards sustainability that will become necessary in the future describing them as a Great Transformation Likewise social upheavals also manifest themselves in space enabling spatial changes to be understood as spatial transformations However on a detailed level it remains unclear what is to be understood by spatial transformation processes and how they manifest themselves Against the background of this need for further research this Research Report addresses concrete issues in the research and shaping of spatial transformation processes The aim is to systematise the largely unordered or disordered knowledge of spatial transformation processes and to contribute to a common understanding of the associated concepts

which can form the basis for further research and for the steering of these processes The articles on the following topics show how spatial and social transformation processes are mutually dependent and what opportunities and challenges interdisciplinary research designs can offer in this context Perspectives on transformation processes Social and settlement structures in change Regional development and innovation Transformation processes in the so called Global South New challenges for planning processes and stakeholders Research on transformation The contributions to theoretical methodological and practical approaches are intended to stimulate a critical discussion on spatial transformation that is open to new interdisciplinary perspectives
