

Dinghy Towing 2013

Fuel-Efficient Hybrids and Small SUVs Top This Year's List

The practice of towing another vehicle four-wheels-down behind a motorhome is still the most practical way for motorhome owners to get around once they've reached their destination. In the early years, only a handful of manufacturers recognized the practice, but by the year 2000, it seemed that the movement was finally gaining steam. Although some models have withdrawn for 2013 (see sidebar, "Where are they now?"), the demand for more fuel-efficient cars has expanded the field of dinghy offerings. Examples include vehicles by Dodge, Ford, Hyundai and Subaru, which will suit a variety of needs and lifestyles.

You've probably noticed that there are other vehicles out there being dinghy towed that aren't on our list, and you may have wondered why. To put it simply, the vehicles in our guide must be approved by the manufacturer for dinghy towing in order to qualify. That means the manufacturer is familiar with the practice of dinghy towing, and has confirmed that its vehicle can be towed in this manner

without causing damage to the drivetrain or otherwise voiding the warranty. Second, the vehicle must be towable without requiring significant mechanical modification (such as disconnecting the driveshaft, for example). Lastly, the vehicle must be towable at a speed of at least 55 mph for no fewer than 200 miles before some sort of prescribed startup procedure is required to circulate fluid through the transmission and/or transfer case.

You'll note that some vehicles will appear and disappear from the list every year, and that's largely because of changes to the vehicle and/or its drivetrain. In other instances, a manufacturer may not have had time to test a new vehicle's dinghy towing worthiness in time for last year's guide, and has since determined that the vehicle is towable.

Keep in mind that we've made every effort to check, and double check with each manufacturer to make sure that our listings are correct and current. However, much of the information we receive is preliminary when the guide is compiled, and can change by the time this issue goes
