Economics of Space and Time Ake E. Andersson, Martin Beckmann, Karl-Gustaf Löfgren, Anders Stenberg, 2013-12-21 This book contains a sample of Professor T nu Puu s contributions to economic theory The topics range from seminal results on investment criteria under imperfect capital markets and rules for optimal resource extraction when the grade of the ore is heterogeneous to applications of modern nonlinear dynamics to well known economic fields like business cycle analysis and oligopoly theory Puu s thinking on cultural economics and his views on the methodology of economic science are also luckily exposed by the papers in this volume Readers interested in the spatial dimension of the economy will find original ideas on the optimal allocation of road capital

The Quick Fix Jesse Singal, 2021-04-06 An investigative journalist exposes the many holes in today s bestselling behavioral science and argues that the trendy TED Talk friendly psychological interventions that are so in vogue at the moment will never be enough to truly address social injustice and inequality With their viral TED talks bestselling books and counter intuitive remedies for complicated problems psychologists and other social scientists have become the reigning thinkers of our time Grit and power posing promised to help overcome entrenched inequalities in schools and the workplace the Army spent hundreds of millions of dollars on a positive psychology intervention geared at

preventing PTSD in its combat soldiers and the implicit association test swept the nation on the strength of the claim that it can reveal unconscious biases and reduce racism in police departments and human resources departments But what if much of the science underlying these blockbuster ideas is dubious or fallacious What if Americans longstanding preference for simplistic self help platitudes is exerting a pernicious influence on the way behavioral science is communicated and even funded leading respected academics and the media astray In *The Quick Fix* Jesse Singal examines the most influential ideas of recent decades and the shaky science that supports them He begins with the California legislator who introduced self esteem into classrooms around the country in the 1980s and the Princeton political scientist who warned of an epidemic of youthful superpredators in the 1990s In both cases a much touted idea had little basis in reality but had a massive impact Turning toward the explosive popularity of 21st century social psychology Singal examines the misleading appeal of entertaining lab results and critiques the idea that subtle unconscious cues shape our behavior As he shows today s popular behavioral science emphasizes repairing improving and optimizing individuals rather than truly understanding and confronting the larger structural forces that drive social ills Like Anand Giridharadas s *Winners Take All* *The Quick Fix* is a fresh and powerful indictment of the thought leaders and influencers who cut corners as they sell the public half baked solutions to problems that deserve more serious treatment

Race & Economics Walter E. Williams, 2013-09-01 Walter E Williams applies an economic analysis to the problems black Americans have faced in the past and still face in the present to show that that free market resource allocation as opposed to political allocation is in the best interests of minorities He debunks many common labor market myths and reveals how excessive government regulation and the minimum wage law have imposed incalculable harm on the most disadvantaged members of our society

A Carbon Primer for the Built Environment Simon Foxell, 2014-01-03 In a world increasingly concerned about the impact of carbon dioxide and other greenhouse gases in the atmosphere on global climate the *A Carbon Primer for the Built Environment* will provide an understanding of the science and the public policy and regulation intended to tackle climate change It will spell out the essential information needed for navigating through the growing regulatory maze with confidence The book will Provide an explanation of climate change why carbon has been targeted as the main culprit and how this will impact the working lives of architects Explain key concepts such as carbon footprinting contraction convergence concentration based targets the Energy Performance of Buildings Directive decarbonising supply and reducing energy demand as well as the relevance of relevant government targets and international agreements Suggest an overall framework for achieving the carbon reduction targets and the requirements that will place on building designers Outline requirements and common standards and codes providing guidance on compliance mechanisms Suggest and examine likely models for future practice The book will be essential reading for anyone wanting to familiarise themselves with the new landscape of carbon reduction in the built environment with a particular focus on building design It will also provide an accessible reference volume for information on particular
