The Unresolved National Question in South Africa Edward Webster,Karin Pampallis,John Mawbey,Jeremy Cronin,2017-03-01 This volume examines the way in which various strands of left thought have addressed the National Question The re emergence of debates on the decolonisation of knowledge has revived interest in the National Question which began over a century ago and remains unresolved Tensions that were suppressed and hidden in the past are now being openly debated Despite this the goal of one united nation living prosperously under a constitutional democracy remains elusive This edited volume examines the way in which various strands of left thought have addressed the National Question especially during the apartheid years and goes on to discuss its relevance for South Africa today and in the future Instead of imposing a particular understanding of the National Question the editors identified a number of political traditions and allowed contributors the freedom to define the question as they believed appropriate in other words to explain what they thought was the Unresolved National Question This has resulted in a rich tapestry of interweaving perceptions The volume is structured in two parts The first examines four foundational traditions Marxism Leninism the Colonialism of a Special Type thesis the Congress tradition the Trotskyist tradition and Africanism The second part explores the various shifts in the debate from the 1960s onwards and includes chapters on Afrikaner nationalism ethnic issues black consciousness feminism workerism and constitutionalism The editors hope that by revisiting the debates not popularly known among the scholarly mainstream this volume will become a catalyst for an enriched debate on our identity and our future

Making Public in a Privatized World David A.

McDonald,2016-02-15 How do we provide effective public services in a deeply neoliberal world In the wake of the widespread failure of privatisation efforts societies in the global south are increasingly seeking progressive ways of recreating the public sector With contributors ranging from cutting edge scholars to activists working in health water and energy provision and with case studies covering a broad spectrum of localities and actors Making Public in a Privatized

World uncovers the radically different ways in which public services are being reshaped from the grassroots up From communities holding the state accountable for public health in rural Guatemala to waste pickers in India and decentralized solar electricity initiatives in Africa the essays in this collection offer probing insights into the complex ways in which people are building genuine alternatives to privatization while also illustrating the challenges which communities face in creating public services which are not subordinated to the logic of the market or to the monolithic state entities of the past

Inequality Studies from the Global South David Francis,Imraan Valodia,Edward Webster,2020-05-04 This book offers an innovative interdisciplinary approach to thinking about inequality and to understanding how inequality is produced and reproduced in the global South Without the safety net of the various Northern welfare states inequality in the global South is not merely a socio economic problem but an existential threat to the social contract that underpins the democratic state and society itself Only a response that is firmly grounded in the context of the global South can hope to address this problem This collection brings together scholars from across the globe with a particular focus on the global South to address broad thematic areas such as the conceptual and methodological challenges of measuring inequality the political economy of inequality in the global South inequality in work households and the labour market and inequalities in land spaces and cities The book concludes by suggesting alternatives for addressing inequality in the global South and around the world The pioneering ideas and theories put forward by this volume make it essential reading for students and researchers of global inequality across the fields of sociology economics law politics global studies and development studies

Uganda Jörg Wiegratz,Giuliano Martiniello,Elisa Greco,2018-11-15 For the last three decades Uganda has been one of the fastest growing economies in Africa Globally praised as an African success story and heavily backed by international financial institutions development agencies and bilateral donors the country has become an exemplar of economic and political reform for those who espouse a neoliberal model of development The neoliberal policies and the resulting restructuring of the country have been accompanied by narratives of progress prosperity and modernisation and justified in the name of development But this self celebratory narrative which is critiqued by many in Uganda masks the disruptive social impact of these reforms and silences the complex and persistent crises resulting from neoliberal transformation Bringing together a range of leading scholars on the country this collection represents a timely contribution to the debate around the New Uganda one which confronts the often sanitised and largely depoliticised accounts of the Museveni government and its proponents Harnessing a wealth of empirical materials the contributors offer a critical multi disciplinary analysis of the unprecedented political socio economic cultural and ecological transformations brought about by neoliberal capitalist restructuring since the 1980s The result is the most comprehensive collective study to date of a neoliberal market society in contemporary Africa offering crucial insights for other countries in the Global South

Sessional Papers Great Britain. Parliament. House of Commons,1909 Parliamentary Papers Great Britain. Parliament. House of Commons,1909 **The Geography of South Africa** Jasper Knight,Christian M. Rogerson,2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South **African, American and European Trajectories of Modernity** Peter Wagner,2015-03-09 *African American and European Trajectories of Modernity* asks why from some moment onwards Europe and the rest of the world entered into a particular relationship one of domination conceived as a kind of superiority and as an advance in historic **The International after 150 Years** George Comninel,Marcello Musto,Victor Wallis,2017-10-02 The International Workingmen s Association was the prototype of all organizations of the Labour movement and the 150th anniversary of its birth 1864 2014 offers an important opportunity to rediscover its history and learn from its legacy The International helped workers to grasp that the emancipation of labour could not be won in a single country but was a global objective It also spread an awareness in their ranks that they had to achieve the goal themselves through their own capacity for organization rather than by delegating it to some other force and that it was essential to overcome the capitalist system itself since improvements within it though necessary to pursue would not eliminate exploitation and social injustice This book reconsider the main issues broached or advanced by the International such as labor rights critiques of capitalism and the search for international solidarity in light of present day concerns With the recent crisis of capitalism that has sharpened more than before the division between capital and labour the political legacy of the organization founded in London in 1864 has regained profound relevance and its lessons are today more timely than ever This book was published as a special issue of *Socialism and Democracy* Police Work and Identity Andrew Faull,2017-09-07 This is a book about the men and women who police contemporary South Africa Drawing on rich original ethnographical data it considers how officers make sense of their jobs and how they find meaning in their duties It demonstrates that the dynamics that lead to police abuses and scandals in transitional and neo liberalising regimes such as South Africa can be traced to the day to day experiences and ambitions of the average police officer It is about the stories they tell themselves about themselves and their social worlds and how these shape the order they produce through their work By focusing on police officers this book positions the individual in primacy over the organisation asking what policing looks like when motivated by the pursuit of ontological security in precarious contexts It acknowledges but downplays the importance of police culture in determining officers attitudes and behaviour and reminds readers that most

officers lives are entangled in and shaped by a range of social political and cultural forces It suggests that a job in the South African Police Service SAPS is primarily just that a job Most officers join the organisation after other dreams have slipped beyond reach their presence in the Service being almost accidental But once employed they re write their self narratives and enact carefully choreographed performances to ease managerial and public pressure and to rationalize their coercive practices In an era where evidence and what works reigns supreme and where cop culture is often deemed a primary socializing force this book emphasises how officers personal histories ambitions and vulnerabilities remain central to how policing unfolds on the street **Inquiry-Based Science in the Primary Classroom** Garima Bansal,Umesh

Ramnarain,2023-06-20 The chapters in this book represent a cross section of research conducted in inquiry based science education at primary levels of schooling in international contexts that include school settings in Australia India Singapore South Africa Turkey Northern Ireland and the United States The book includes empirical studies on the role of inquiry based learning in advancing students conceptual understanding and modelling proficiency students understandings about the nature of scientific inquiry classroom studies on teachers enactment of inquiry based learning teachers facilitation of classroom discourse for inquiry based learning and co teaching in developing teachers in adopting an inquiry based pedagogy It was originally published as a special issue of the journal Education 3 13 **Urban and Regional Planning**

and Development Rajiv R. Thakur,Ashok K. Dutt,Sudhir K. Thakur,George M. Pomeroy,2020-02-10 This book discusses urban planning and regional development practices in the twentieth century and ways in which they are currently being transformed It addresses questions such as What are the factors affecting planning dynamics at local regional national and global scales With the push to adopt a market paradigm in land development and infrastructure the relationship between resource management sustainable development and the role of governance has been transformed Centralized planning is giving way to privatization not only in the traditional regions but also in newly emerging regions of Asia Africa and Latin America Further attempts are being made to bring planning related decision making closer to the people who are most affected by it Presenting a collection of studies from scholars around the world and highlighting recent advances in the field the book is a valuable reference guide for those engaged in urban transformations whether as graduate students researchers practitioners or policymakers **Collective Action and Political Transformations** Mota Aurea Mota,2019-04-03 This

book acknowledges the severe problems with effective and significant collective action but arrives at a more optimistic diagnosis of our time by rethinking the political from the angle of the experiences with progressive and conservative collective action in different parts of the globe Brazil South Africa and Europe By doing so it contributes a critical perspective to the debate about the possible impact of parts of the Global South for positive social and political developments worldwide

Farmer's Weekly ,1918 **Pedagogy in Poverty** Ursula Hoadley,2017-08-09 As South Africa transitioned from apartheid to democracy changes in the political landscape as well as educational agendas and discourse on both a national

and international level shaped successive waves of curriculum reform over a relatively short period of time Using South Africa as a germane example of how curriculum and pedagogy can interact and affect educational outcomes Pedagogy in Poverty explores the potential of curricula to improve education in developing and emerging economies worldwide and ultimately to reduce inequality Incorporating detailed empirical accounts of life inside South African classrooms this book is a much needed contribution to international debate surrounding optimal curriculum and pedagogic forms for children in poor schools Classroom level responses to curriculum policy reforms reveal some implications of the shifts between a radical progressive approach and traditional curriculum forms Hoadley focuses on the crucial role of teachers as mediators between curriculum and pedagogy and explores key issues related to teacher knowledge by examining the teaching of reading and numeracy at the foundational levels of schooling Offering a data rich historical sociology of curriculum and pedagogic change this book will appeal to academics researchers and postgraduate students in the fields of education sociology of education curriculum studies educational equality and school reform and the policy and politics of education
