the other Cloonan examines the development of policy under New Labour numerous reports which have charted the economics of the industry the New Deal for Musicians scheme and the impact of devolution on music policy in Scotland He makes the case for the inherently political nature of popular music and asserts that the development of popular music policies can only be understood in the context of an increasingly close working relationship between government and the cultural industries In addition he argues that a rather myopic view of the music industries has meant that policy initiatives have lacked cohesion and have generally served the interests of multinational corporations rather than struggling musicians

Martin,2014-09-01 The first OZCOTS

conference in 1998 was inspired by papers contributed by Australians to the 5th International Conference on Teaching Statistics. In 2008 as part of the program of one of the first National Senior Teaching Fellowships the 6th OZCOTS was held in conjunction with the Australian Statistical Conference with Fellowship keynotes and contributed papers optional refereeing and proceedings. This venture was so successful that the 7th and 8th OZCOTS were similarly run conjoined with Australian Statistical Conferences in 2010 and 2012. Authors of papers from these OZCOTS conferences were invited to develop chapters for refereeing and inclusion in this volume. There are sections on keynote topics, undergraduate curriculum and learning, professional development, postgraduate learning and papers from OZCOTS 2012. Because OZCOTS aim to unite statisticians and statistics educators, the approaches this volume takes are immediately relevant to all who have a vested interest in good teaching practices. Globally, statistics as a discipline, statistical pedagogy and statistics in academia and industry are all critically important to the modern information society. This volume addresses these roles within the wider society as well as questions that are specific to the discipline itself. Other chapters share research on learning and teaching statistics in interdisciplinary work and student preparation for futures in academia, government and industry.
