Le dictionnaire de collocations est-il indispensable ?

Agnès Tutin, LIDILEM, Grenoble

Résumé

Dans cet article, nous comparons deux dictionnaires de collocations (le *Dictionnaire des cooccurents* de Beauchesne (2001) et le *Lexique Actif du Français* (Mel'čuk et Polguère, en préparation)) avec les versions électroniques de deux dictionnaires de langue de référence du français : le *Petit Robert Electronique* (version 2.1) et le *Trésor de la Langue Française Informatisé*. Nous essayons d'évaluer dans quelle mesure les dictionnaires spécialisés paraissent mieux adaptés que les dictionnaires de langue pour le traitement des collocations en examinant trois points : l'accès aux expressions, la quantité de collocations recensées et le traitement linguistique effectué sur les expressions.

Abstract

This paper compares two French dictionaries of collocations (le *Dictionnaire des cooccurents* de Beauchesne (2001) and le *Lexique Actif du Français* (Mel'čuk et Polguère, in preparation)) with electronic versions of two well known French dictionaries: the *Petit Robert Electronique* (version 2.1) and the *Trésor de la Langue Française Informatisé*. Our goal is to evaluate to what extent specialised dictionaries are really better suited than general monolingual dictionaries in representing collocations for educational purposes. Three parameters are examined: the access to collocations in dictionaries, the quantity of data and the linguistic treatment of collocations.

1. Préambule

La recherche linguistique dans le domaine des collocations, ces unités préfabriquées à mi-chemin entre locutions et combinaisons libres, a connu une activité foisonnante ces dernières années. Ces affinités lexicales étaient déjà signalées comme *séries phraséologiques* par Bally (1909), mais ce n'est qu'assez récemment qu'elles ont été systématisées par les lexicologues et lexicographes (Voir en particulier Hausmann (1989) ou Mel'čuk (1998)).

Ni complètement libres, ni complètement figées, les collocations posent des problèmes intéressants pour la théorie linguistique. En linguistique appliquée, c'est en lexicographie, et surtout pour des applications didactiques, que la notion a été approfondie. De nombreux dictionnaires ont ainsi vu le jour, d'abord dans le domaine anglais, puis plus récemment pour le français : *Dictionnaire explicatif et combinatoire* (Mel'čuk et al., 1984, 1988, 1992, 1999), *Dictionnaire collocationnel du français général* (Grobelač, 1990), *Dictionnaire des cooccurents* de Beauchesne (2001), *Dictionnaire combinatoire du français* de Zinglé et Brobeck-Zinglé (2003), entre autres. Des projets ambitieux de ressources électroniques à visée didactique sont en cours d'élaboration à Louvain (*Dictionnaire d'apprentissage du français langue étrangère ou seconde* de Verlinde et al. (2001)) et à Montréal (*DiCo* de Polguère et Mel'čuk (Pogière, 2000)).

Parallèlement à ces ressources spécialisées, des versions informatisées de dictionnaires de langue, le TLF ou le *Petit Robert* sont désormais aussi disponibles, ce qui devrait permettre un accès ciblé aux informations de cooccurrence présentes dans différents champs du dictionnaire, comme le montre Fontenelle pour un dictionnaire bilingue (Fontenelle, 1997). Dès lors que ces outils informatiques permettent des recherches fines sur les informations de cooccurrence, on peut se demander si les répertoires spécialisés, qui de surcroît présentent une nomenclature limitée, conservent un réel intérêt. C'est cette piste que nous nous proposons d'explorer dans cette étude. Nous essaierons de déterminer dans quelle mesure les dictionnaires de collocations sont véritablement indispensables, et si l'utilisation judicieuse des dictionnaires généralistes ne peut pas simplement y suppléer, au moins en partie. Pour donner des éléments de réponse à cette question, on
