implementing these policies Professor Grant uses an analytical framework drawn from the leading theories of public policy formation such as policy communities to address the issues raised by California's policy making experience This study shows how an ambitious attempt to encourage the use of electrically powered vehicles has faced technological constraints consumer resistance and political opposition Other policies developed in the state such as dealing with gross emitters trip reduction programmes and the construction of light rail and subway systems are also critically examined The concluding chapter relates Californian experience to the developing debate in Britain and the European Union about air pollution from motor vehicles Autos Smog and Pollution Control will be welcomed for its critical analysis of California's air pollution control policies as well as for the light which it sheds on contemporary theories of policy formation and the changing forces affecting environmental policymaking
