Wiki vs NWO (New World Order) Grant Elder,2014-11-05 Most people shun the word conspiracy The media has made it seem like all conspiracies are theories and that anyone who discusses them is a tinfoil hat Yet anyone who has studied history or business knows that conspiracies are a part of the human experience Once we realize this the question arises what conspiracies are occurring in our time that are significant What perceptions of the world do we hold that are incorrect Western civilization although technologically advanced beyond the days of a Flat Earth or geocentric universe is blind to its own corruptions Our governing practices were established over a century ago and have evolved very little If we could apply the success we've had in science technology and understanding the human condition to the way we govern our society what would our world look like Be forewarned The journey starts off frightfully dark and many people do not have the emotional fortitude to face the real demons But if you make the journey it is very rewarding to realize that we have at our disposal the means to create a remarkable world for the next generation if we so choose This book blends business management strategies leveraged by technology to address the inherent problems in governments Presented in a clear step by step manner that provides readers with a unique and fresh look at alternatives to our present system **Decreasing Fuel**

Consumption and Exhaust Gas Emissions in Transportation Michael Palocz-Andresen,2012-12-15 Within all areas of transportation solutions for economical and environmentally friendly technology are being examined Fuel consumption combustion processes control and limitation of pollutants in the exhaust gas are technological problems for which guidelines like 98/69 EC and 99/96 determine the processes for the reduction of fuel consumption and exhaust gas emissions Apart from technological solutions the consequences of international legislation and their effects on environmental and climate protection in the area of the transportation are discussed **Fly, Eject, or Die: Understanding Split-Second Spiritual**

Deconstructing Dr. Strangelove Sean M. Maloney,2020-07-01 King of the Cold War crisis film Dr Strangelove became a cultural touchstone from the moment of its release in 1964 The duck and cover generation saw it as a satire on nuclear issues and Cold War thinking Subsequent generations removed from the film s historical moment came to view it as a quasi documentary about an unfathomable secret world Sean M Maloney uses Dr Strangelove and other genre classics like Fail Safe and The Bedford Incident to investigate a curious pop cultural contradiction Nuclear crisis films repeatedly portrayed the failures of the Cold War s deterrent system Yet the system worked What does this inconsistency tell us about the genre What does it tell us about the deterrent system for that matter Blending film analysis with Cold War history Maloney looks at how the celluloid crises stack up against reality or at least as much of reality as we can reconstruct from these films with confidence The result is a daring intellectual foray that casts new light on Dr Strangelove one of the Cold War era s defining films

Fighting Machines Dan Saxon,2021-12-03 Lethal autonomous weapons are weapon systems that can select and destroy targets without intervention by a human operator Fighting Machines explores the relationship between lethal autonomous weapons LAWS the concept of human dignity and international law Much of this analysis speaks to three fundamental and related problems When a LAWS takes a human life is that killing a violation of human dignity Can states and non state actors use LAWS in accordance with international law And are there certain responsibilities of human decision making during wartime that we should not delegate to machines In the book Dan Saxon argues that the use of LAWS to take human life constitutes a violation of human dignity Rather than concentrating on the victims of the use of lethal force Saxon instead focuses on the technology and relevant legal principles and rules to advance several propositions First as LAWS operate at increasingly greater speeds their use will undermine the opportunities for and the value of human reasoning and judgment Second by transferring responsibility for reasoning and judgment about the use of lethal force to computer software the use of LAWS violates the dignity of the soldiers commanders and law enforcement officers who historically have made such decisions and therefore breaches international law Third weapon designs that facilitate teamwork between humans and autonomous systems are necessary to ensure that humans and LAWS can operate interdependently so that individuals can fulfil their obligations under international law including the preservation of their own dignity and ensure that human reasoning and judgment are available for cognitive functions better suited to humans than machines Fighting Machines speaks to the fields of international humanitarian law human rights criminal law and legal philosophy It will also be of interest to non lawyers especially military officers government policy makers political scientists and international relations scholars as well as roboticists and ethicists
