Drawing on the expertise of new co-author Sheila Grossman, the Ninth Edition maintains its comprehensive depth while paring down content where appropriate and replacing descriptive content with striking art. Approximately 600 illustrations are new or have been re-rendered in a consistent modern style. Also new to this edition are advanced 3D narrated animations that address the most clinically relevant and difficult to understand disorders, engaging unit opening case studies that reinforce critical thinking and set the tone for the content to come, and a wide range of built-in study tools. Now for the first time, Porth's Pathophysiology is supported by PrepU, an adaptive learning system that helps students learn more while giving instructors the data they need to monitor each student's progress, strengths, and weaknesses.
