(QUESTION 5 (Start on a new page.)

A 12 kg block is initially at rest at point A at the bottom of a ROUGH inclined plane. The block is pulled up the incline by a constant force F acting parallel to the incline. The block reaches point B, which is at a vertical height of 4.0 m above the horizontal, with a speed of 3.00 m/s. See the diagram below.

- Define the term non-conservative force.
- Draw a labelled free-body diagram for the block when it is pulled up the incline.
- Calculate the total work done on the block by the NON-CONSERVATIVE forces when the block moves from point A to point B. (5)

The same constant force F now moves the block at a CONSTANT VELOCITY across a rough horizontal surface from point B to point C, as shown below. Force F acts parallel to the horizontal surface.

The magnitude of the constant frictional force acting on the block while moving from point B to point C is 40 N, 40% of the magnitude of the constant frictional force acting on the block when it moves from point A to point B.

Law and Regulation of Mobile Payment Systems Joy Malala, 2017-11-28 Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa In Kenya the introduction of M Pesa a new financial services model has transformed the banking and financial services industry Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts This book addresses the legal and regulatory issues arising out of the introduction of M Pesa in Kenya and its drive towards financial inclusion It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya

The President, the State and the Cold War James Bilisland, 2015-02-11 US foreign policy during the Cold War has been analysed from a number of perspectives generating large bodies of literature attempting to explain its origins its development and its conclusion However there are still many questions left only partially explained In large part this is because these accounts restrict themselves to a single level of analysis either the international system or the structure of the state and society The first level of analysis focusing on the role of individuals has largely been excluded This book argues that structural theories and any approach that limits itself

to one level of analysis are inadequate to explain the development of US foreign policy. Instead, it is necessary to incorporate the first level of analysis in order to bring human agency back and provide a more detailed explanation of US foreign policy. Bilsland proposes an analytical framework which incorporates presidential agency into a multi-level analysis of US foreign policy during the Cold War, constructing a multi-level case study comparison of the foreign policies of Presidents Truman and Reagan. He argues that the worldview of the president is central to agenda setting in US foreign policy making and that the management style of the president influences both decision making and the implementation of US foreign policy. Evidence to support this is drawn from detailed empirical analysis of Truman's foreign policy of containment in Korea and Reagan's foreign policy of rollback in Nicaragua. This work will be of interest to students and scholars of US Foreign Policy, US History and International Relations.

The Cuban Missile Crisis Len Scott, R. Gerald Hughes, 2015-04-10. This volume brings together a collection of leading international experts to revisit and review our understanding of the Cuban Missile Crisis via a critical reappraisal of some of the key texts. In October 1962, humankind came close to the end of its history. The risk of catastrophe is now recognised by many to have been greater than realised by protagonists at the time or scholars subsequently. The Cuban missile crisis remains one of the most intensely studied moments of world history. Understanding is framed and informed by Cold War historiography, political science and personal experience, written by scholars, journalists and surviving officials. The emergence of Soviet, later Russian and other national narratives has broadened the scope of enquiry, while scrutiny of the operational, especially military dimensions, has challenged assumptions about the risk of nuclear war. *The Cuban Missile Crisis: A Critical Reappraisal* brings together world-leading scholars from America, Britain, France, Canada and Russia to present critical scrutiny of authoritative accounts and to recast assumptions and interpretations. The book aims to provide an essential guide for students of the missile crisis, the diplomacy of the Cold War and the dynamics of historical interpretation and reinterpretation. Offering original ideas and agendas, the contributors seek to provide a new understanding of the secrets and mysteries of the moment when the world went to the brink of Armageddon. This book will be of great interest to students of the Cuban missile crisis, Cold War Studies, nuclear proliferation, international history and International Relations in general.

Strategy Shelved Steven Wills, 2021-08-15. As US strategy shifts once again to focus on great power competition, *Strategy Shelved* provides a valuable analytic look back to the Cold War era by examining the rise and eventual fall of the US Navy's naval strategy system from the post-World War II era to 1994. Steven T. Wills draws some important conclusions that have relevance to the ongoing strategic debates of today. His analysis focuses on the 1970s and 1980s as a period when US

Navy strategic thought was rebuilt after a period of stagnation during the Vietnam conflict and its high water mark in the form of the 1980s maritime strategy and its attendant six hundred ship navy force structure He traces the collapse of this earlier system by identifying several contributing factors the provisions of the Goldwater Nichols Act of 1986 the aftermath of the First Gulf War of 1991 the early 1990s revolution in military affairs and the changes to the Chief of Naval Operations staff in 1992 following the end of the Cold War All of these conditions served to undermine the existing naval strategy system The Goldwater Nichols Act subordinated the Navy to joint control with disastrous effects on the long serving cohort of uniformed naval strategists The first Gulf War validated Army and Air Force warfare concepts developed in the Cold War but not those of the Navy's maritime strategy The Navy executed its own revolution in military affairs during the Cold War through systems like AEGIS but did not get credit for those efforts Finally the changes in the Navy OPNAV staff in 1992 served to empower the budget arm of OPNAV at the expense of its strategists These measures laid the groundwork for a thirty year strategy of means where service budgets a desire to preserve existing force structure and lack of strategic vision hobbled not only the Navy but also the Joint Force's ability to create meaningful strategy to counter a rising China and a revanchist Russian threat Wills concludes his analysis with an assessment of the return of naval strategy documents in 2007 and 2015 and speculates on the potential for success of current Navy strategies including the latest tri service maritime strategy His research makes extensive use of primary sources oral histories and navy documents to tell the story of how the U S Navy created both successful strategies and how a dedicated group of naval officers were intimately involved in their creation It also explains how the Navy's ability to create strategy and even the process for training strategy writers was seriously damaged in the post Cold War era

discourse Consequently Framing the Threat argues Obama was unable to implement the policy changes he had announced
