and Issues in School Mathematics in East Asia** ,2010-01-01 Worldwide efforts to improve students learning of
mathematics have turned educational researchers attention to some high achieving education systems especially those in
East Asia including Chinese Mainland Hong Kong Japan Singapore South Korea and Taiwan However there is much less
sharing and learning of educational policy and practices that goes beyond one or two such high achieving education systems
At this time when educational changes and reforms for improving students learning of mathematics are also underway within
these high achieving education systems in East Asia it becomes timely and important for the world to learn why and how
relevant changes take place across these selected education systems This book has put together a set of papers that
individually presents issues on the changing mathematics curriculum and teacher education in the six high achieving
education systems in East Asia Collectively the book extends beyond what we can learn about exemplary practices in
individual education systems in East Asia It helps us develop a better understanding of the interplay between various
measures for the pursuit of excellence in mathematics curriculum and teacher education on the one hand and the different
system contexts on the other The intended readers of the book include education policy makers curriculum developers
researchers teachers teacher educators and anyone else interested in school mathematics curriculum and teacher education
