

Global warming is a hot topic. There is strong consensus that the world is getting warmer. At the time of writing, the warmest seven years ever have all been since 2015, with 2016, 2019, and 2020 constituting the top three (source: World Meteorological Organization).

Although the warming trend is well documented, there is considerable debate about the cause. Could it be part of a natural cycle? Or, is it due to human activity? Scientists, environmentalists, and policymakers who believe that human activity is the cause of global warming point to the reduction of carbon emissions as part of the solution.

- 37.** Use the Internet to learn more about global warming and get some different perspectives on the issue. Visit at least one website for each of the following categories: government agency, environmental advocacy organization, large manufacturer, and energy company. In a short report, summarize what you find and offer an opinion about what should be done to combat global warming.

- 38.** Use the Internet to identify actions and strategies that businesses, governments, and individuals could adopt to limit carbon emissions. Report your findings in a table.

- 39.** Choose three actions or strategies that could help reduce carbon emissions and write a short explanation of how they might impact business practices.

Interactions and Connections

- 40.** Interview someone in your community who owns a business or works for a large company or organization. Obtain information about actions that need to be considered when hiring people, designing products, and making other business decisions. Ask them how ethics might affect their daily lives and the lives of others.

- 41.** Based on their answers and what you have learned in this chapter, create a short code of ethics that might be used to guide the decisions made by managers and employees in a company.

Active Directory Infrastructure Creating the Logical Design for a Network Services Infrastructure Creating the Physical Design for an Active Directory and Network Infrastructure **Migrating and Settling in a Mobile World** Zana Vathi, 2015-05-18 This open access book draws on award winning cross generational research comparing the complex and life changing processes of settlement among Albanian migrants and their adolescent children in three European cities London UK Thessaloniki Greece and Florence Italy Building on key concepts from the social sciences and migration studies such as identity integration and transnationalism the author links these with emerging theoretical notions such as mobility translocality and cosmopolitanism Ethnic identities transnational ties and integration pathways of the youngsters and adults are compared focusing on intergenerational transmission in particular and recognizing mobility as an inherent characteristic of contemporary lives Departing from the traditional focus on the adult children of settled migrants and the main immigration countries of continental North Western Europe this study centres on Southern Europe and Great Britain and a very recently settled immigrant group The result is an illuminating early look at a second generation in the making Indeed the findings provide ample grounds for pragmatic and forward looking policy to enable these migrant origin youngsters and others like them to more fully attain their potential The book ends with a call to reassess the term second generation as it is currently used in policy and scholarly works Children of migrants seldom see themselves as a particular and homogeneous group with ethnicity as an intrinsic identifying quality More importantly they make use of all the limited resources at their disposal and view their integration processes through broader geographies showing sometimes a cosmopolitan orientation but also using localized reference points such as the school city or urban neighbourhood CIMA Official Learning System Test of Professional Competence in Management Accounting Heather Barnwell, Nick Best, 2008-07-15 The 2009 edition of CIMA s Official Learning Systems has been written in conjunction with the Examiner to fully reflect what could be tested in the exam Fully revised and in 2 color paperback format the 2009 Learning Systems provide complete study material for the May and November 2009 exams This edition includes practice questions throughout complete revision section topic summaries recommended reading articles from a range of journals Q A s CIMA Learning Systems are the only study materials endorsed and recommended by CIMA **Global Trends of Smart Cities** Tooran Alizadeh, 2021-03-31 Global Trends of Smart Cities provides integrated analysis of 135 cities that participated in the IBM s Smarter Cities Challenge in 2010 2017 It establishes evidence based benchmarking of city geographies city sizes governance structures and local planning contexts in smart cities This book uses a combination of descriptive statistical analysis and real world case study narratives to evaluate the ways in which each individual urban variable or their combination matter in the diversity of smart city approaches around the globe It is acknowledged that the Smarter Cities Challenge offers a particular set of smart initiatives and is not representative of all smart cities around the world Nevertheless the global presence of the Challenge across five continents and its involvement with 135 cities of all size and socioeconomic status provides a solid foundation to

conduct comparative research on smart cities Considering limited comparative research available in the smart city debate this book makes significant contribution in understanding the state of smart city development in urban governments worldwide Offers an integrated assessment of smart cities using a combination of statistical analysis and real world case study narrations Compares smart city interventions from the 135 cities that participated in the Smarter Cities Challenge with detailed case study narrations included for 17 cities Demonstrates the ways in which geography size governance and local planning context each individually and in combination with each other influence smart city development around the globe Develops an urban research perspective to the smart city discourse otherwise dominated by digital and IT specialists engineers and business experts Identifies the North South divide as the most influential factor explaining how smart urbanism is framed worldwide and argues that the future of smart city development depends on how smart approaches the ongoing and increasing level of inequity and inequality not only within our cities but also at the transregional and transnational levels
