BASELINE ASSESSMENT

ACTIVITY 1

QUESTION 1: REASON WHY THE WORLD WAR I BROKE OUT.

Study the source and answer the questions that follow.

SOURCE A

World War I, also known as the Great War, began in 1914 after the assassination of Archduke Franz Ferdinand of Austria. His murder catapulted into a war across Europe that lasted until 1918. During the conflict, Germany, Austria-Hungary, Bulgaria and the Ottoman Empire (the Central Powers) fought against Great Britain, France, Russia, Italy, Romania, Canada, Japan and the United States (the Allied Powers). Thanks to new military technologies and the horrors of trench warfare, World War I saw unprecedented levels of carnage and destruction. By the time the war was over and the Allied Powers claimed victory, more than 16 million people—soldiers and civilians alike—were dead.

Topics in Environmental Economics M. Boman,Runar Brännlund,Bengt kriström,1999-07-31 This book shows we believe the breadth and the complexity of issues that economists now tackle in their analysis of the connections between the ecosystem and the economic system The book offers contributions to such disparate issues as the value of preserving the wolf in Sweden and the proper distribution of permits in an effective global warming treaty Because these questions remain at the fore front of important resource allocation problems that need to be confronted it is only appropriate that they are represented in a book that intends to paint a picture albeit certainly incomplete of the vibrant and progressing state of environmental economics The contributions cover five areas of environmental economics policy instruments cost benefit analysis cost efficiency contingent valuation and experimental economics Each area is worthy of a book by itself but here we have made a point of focusing on problems that seem directly applicable to the pressing policy issues of today Thus the contributors address topics that are directly relevant to international and regional policy making as well as those that are linked to development of supporting information systems e g resource accounting In addition the contributions seek to provide high level applications of measurement techniques as well as pertinent critiques of these methods The next section provides a summary overview of the book

Handbook of the Economics of Education Eric A. Hanushek,Stephen J. Machin,Ludger Woessmann,2010-11-11 How does education affect economic and social outcomes and how can it inform public policy Volume 3 of the Handbooks in the Economics of Education uses newly available high quality data from around the world to address these and other core questions With the help of new methodological approaches contributors cover econometric methods and international test score data They examine the determinants of educational outcomes and issues surrounding teacher salaries and licensure And reflecting government demands for more evidence based policies they take new looks at institutional features of school systems Volume editors Eric

A Hanushek Stanford Stephen Machin University College London and Ludger Woessmann Ifo Institute for Economic Research Munich draw clear lines between newly emerging research on the economics of education and prior work In conjunction with Volume 4 they measure our current understanding of educational acquisition and its economic and social effects Uses rich data to study issues of high contemporary policy relevance Demonstrates how education serves as an important determinant of economic and social outcomes Benefits from the globalization of research in the economics of education
