Predicting Students' Performance on Agricultural Science Examination from Forecast Grades Thobega Moreetsi, Masole Trust Mbako, 2008

The Botswana Examination Council BEC uses forecast grades obtained from secondary school Agriculture teachers to review component 2 of Agriculture final examination Moderation of component 2 can help to improve candidates final grade This descriptive correlational study purports to determine which of the component 1 multiple choice component 2 structured questions and component 3 course work of the BGCSE Botswana General Certificate of Secondary Education agriculture can be used to predict students forecast grades Examination scores spanning seven years 2001 2007 were obtained from BEC records Two senior secondary schools were randomly selected from each of the five educational regions in Botswana and then a systematic random sample of candidates with their respective scores was obtained from each of the selected schools A multiple regression analysis was conducted using a backward procedure and it revealed that all the components 1 2 and 3 significantly predicted forecast grades Components 2 shared the largest 31.6% variability with forecast scores It was recommended that teachers should use composite scores from different school based assessments to determine forecast grades
