For that reason the experimental topics covered during the meeting ranged from precision measurements with hadronic and electromagnetic probes to ultra relativistic heavy ion reactions Correspondingly the theoretical topics spanned an equally wide range including perturbative and lattice QCD calculations as well as effective theories and QCD motivated quark models In the morning sessions invited reviews were given In the afternoon twelve topical parallel sessions directed by conveners summarized the newest research results *Complex Systems in Finance and Econometrics* Robert A.

line teachers and school administrators Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals where the local languages of the students are usually neglected or viewed unfavourably in relation to the L2 in mainstream society and where teachers are usually positioned as recipients of knowledge rather than makers of knowledge In closing Chapter 9 reviews the state of the art in the field and proposes directions for future inquiry
