Linguistic Influences on Mathematical Cognition Ann Dowker,Hans-Christoph Nuerk,2017-06-16 For many years an abstract amodal semantic magnitude representation largely independent of verbal linguistic representations has been viewed as the core numerical or mathematical representation This assumption has been substantially challenged in recent years Linguistic properties affect not only verbal representations of numbers but also numerical magnitude representation spatial magnitude representations calculation parity representation place value representation and even early number acquisition Thus we postulate that numerical and arithmetic processing are not fully independent of linguistic processing This is not to say that in patients magnitude processing cannot function independently of linguistic processing we just suppose these functions are connected in the functioning brain So far much research about linguistic influences on numerical cognition has simply demonstrated that language influences number without investigating the level at which a particular language influence operates After an overview we present new findings on language influences on seven language levels Conceptual Conceptual properties of language Syntactic The grammatical structure of languages beyond the word level influences Semantic The semantic meaning or existence of words Lexical The lexical composition of words in particular number words Visuo spatial orthographic Orthographic properties such as the writing reading direction of a language Phonological Phonological phonetic properties of languages Other language related skills Verbal working memory and other cognitive skills related to language representations We hope that this book provides a new and structured overview on the exciting influences of linguistic processing on numerical cognition at almost all levels of language processing

Community-Based Health Literacy Interventions National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Roundtable on Health Literacy,2018-05-10 In its landmark report Health Literacy A Prescription to End Confusion the Institute of Medicine noted that there are 90 million adults in the United States with limited health literacy who cannot fully benefit from what the health and health care systems have to offer Since the release of that report health literacy has become a vibrant research field that

has developed and disseminated a wide range of tools and practices that have helped organizations ranging in size from large health care systems to individual health care providers and pharmacists to engage in health literate discussions with and provide health literate materials for patients and family members Improving the health literacy of organizations can be an important component of addressing the social determinants of health and achieving the triple aim of improving the patient experience improving the health of populations and reducing the cost of care However the focus on organizations does not address the larger issue of how to improve health literacy across the U S population To get a better understanding of the state of community based health literacy interventions the Roundtable on Health Literacy hosted a workshop on July 19 2017 on community based health literacy interventions It featured examples of community based health literacy programs discussions on how to evaluate such programs and the actions the field can take to embrace this larger view of health literacy This publication summarizes the presentations and discussions from the workshop

Daniel, 2018-06-20 This book covers the current state of thinking and what it means to have a framework of representational competence and how such theory can be used to shape our understanding of the use of representations in science education assessment and instruction Currently there is not a consensus in science education regarding representational competence as a unified theoretical framework There are multiple theories of representational competence in the literature that use differing perspectives on what competence means and entails Furthermore dependent largely on the discipline language discrepancies cause a potential barrier for merging ideas and pushing forward in this area While a single unified theory may not be a realistic goal there needs to be strides taken toward working as a unified research community to better investigate and interpret representational competence An objective of this book is to initiate thinking about a representational competence theoretical framework across science educators learning scientists practitioners and scientists As such we have divided the chapters into three major themes to help push our thinking forward presenting current thinking about representational competence in science education assessing representational competence within learners and using our understandings to structure instruction *Backpacker*, 2007-09 Backpacker brings the outdoors straight to the reader's
