

Name: IOI

Date: 8/24/2020

Student Exploration: Density

Vocabulary: density, mass, matter, volume

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. List three objects that you think would sink in water, and three objects you think would float.

Sink: coins, rocks, marbles

Float: leaves, plastic, water bottles

2. Why do you think some things float and some things sink? I think that some objects float because they are less dense than water and objects sink because they are more dense than water.

Gizmo Warm-up

1. In the Gizmo, drag the **apple** onto the **Scale**. The scale measures **mass**. Mass is the amount of **matter**, or "stuff," in an object.

What is the apple's mass? 33.0g (Note: "g" stands for grams.)

2. An object's **volume** is the amount of space it takes up. The volume of an object can be measured by using a **graduated cylinder**. Observe the graduated cylinder and the blue text showing the volume of water inside the cylinder.

A. What is the starting volume of water in the graduated cylinder? 400.0 mL

B. Place the apple into the cylinder. What is the volume in the cylinder now? 444.0 mL

The water rises in the cylinder because it is displaced, or pushed upward, by the apple. The amount of displaced water is equal to the volume of the apple.

C. What is the volume of the apple? 44.0 cm³ (Use the **Object volume** to check.)

Note: Milliliters (mL) are used for liquid volumes, while cubic centimeters (cm³) are used for solids. One mL is the same volume as one cm³. The apple's volume is measured in cm³.

Activity A:
Sink or float?

Get the Gizmo ready:

- Replace all objects on the shelf.
- Be sure the liquid in the beaker is **Water**.
