**The Umbilical Cord Blood Controversies in Medical Law** Karen Devine, 2017-01-12 Since the therapeutic value of umbilical cord blood UCB stem cells was first recognised in the late 1980s there has been a proliferation of both public and private UCB banks worldwide However the ability to utilise such a potentially valuable resource has provoked a number of controversies In a distinctly accessible style this book unpacks the socio legal implications of the UCB collection process and constructs a detailed analysis of the law and ethics that surrounds UCB banking in the UK including ownership of the cells Its enquiry is located within the theoretical framework of altruism versus self interest and explores the notions of risk and choice associated with this distinctive blend of public private healthcare provision The book evaluates the impact of the Human Tissue Act 2004 and the European Union Tissues and Cells Directive 2004 23 EC on the UCB industry and provides a unique insight into the effect that the law may have on the NHS whose maternity staff and premises are used to collect UCB This book would be of interest primarily to a UK readership in addition to expectant families health professionals students academics practitioners and the UCB industry elsewhere in the world The Politics and Practice of Occupational Health and Safety Law Enforcement Diego Canciani, 2018-10-04 This book takes a critical approach to examining British and Italian occupational health and safety enforcement policies and questions the legal and political principles that underpin them The book undertakes a comparative critical analysis of these two jurisdictions health and safety regulatory enforcement practices by focusing on the causes and consequences of the under criminalisation of these crimes It explores the fundamentals of these two jurisdictions criminal justice systems and political practices policies and traditions and exposes how these translate into pragmatic social inequality and injustice for victims of occupational health and safety crimes and more generally citizens Findings are drawn from qualitative interviews conducted with front line occupational health and safety enforcement officers This book offers an account of the challenges encountered when attempting to scrutinise public institutions responsible for policing crimes of the powerful The comparison of the political and criminal justice system practices policies and traditions of the British and Italian legal systems offer a valuable critical contribution to the anglophone literature on the subject and more generally on regulatory enforcement policies and practices **Clay's Handbook of Environmental Health** Stephen Battersby, 2016-07-01 Clay s Handbook of Environmental Health since its first publication in 1933 has provided a definitive guide for the environmental health practitioner or reference for the consultant or student This 21th edition continues as a first point of reference reviewing the core principles techniques and competencies and then outlining the specialist subjects It has been refocused on the current curriculum of the UK s Chartered Institute of Environmental Health but should also readily suit the generalist or specialist working outside the UK *Extremisms in Africa Volume 2* Alain Tschudin, Craig Moffat, Stephen Buchanan-Clarke, Susan Russell, Lloyd Coutts, 2019-06-18 Over the past two decades the rapid emergence and spread of both local and transnational extremist organisations has become a primary source of insecurity in Africa Extremist

organisations represent the fluid and variable nature of conflict systems today and are at the heart of some of Africa's most enduring conflicts. Moreover, the inability of African states to contain the threat of extremism or of heavy handed security responses has led to the loss of thousands of lives, displaced millions and deeply impacted the continent's democratisation and development goals. This is the second anthology published by Good Governance Africa (GGA) on the topic of extremism and political violence in Africa. *Extremisms in Africa*, one of the first anthologies of its kind on this topic to be authored and published on the African continent, provided an account of how extremist groups arose in Africa and the various ways in which they have harnessed their global agendas to local conflict dynamics and structural challenges, enabling them to exploit the grievances of individuals and communities for their cause. This anthology, *Extremisms in Africa Volume 2*, looks forward, giving special attention to the ways in which emergent trends in global geopolitics and conflict dynamics merge to impact upon the African continent. To this end, we have sought to engage diverse topics ranging from ecological concerns surrounding climate change and migration, the implications of such human movement for modern day trafficking and slavery, and the roles of women and youth. State responses to extremism on the African continent are not uniform; the capacity of individual states to detect, identify, police, investigate and prosecute is highly variable. At the most fundamental level, extremism is ripe to arise in contexts where governments are failing, especially when democracy is on the wane. This anthology identifies some of the most pressing challenges in addressing extremism today and provides chapters that could offer actionable policy insights to governments and civil society. Given the nature of Africa's geopolitical landscape, state and security services alone cannot prevent extremism. It will take a whole of society approach where government, civil society, academia, communities, families and individuals collaborate to better understand the local dynamics of recruitment and radicalisation and develop context specific strategies in response. This anthology will hopefully provide practitioners with improved insight into some of the key challenges and potential solutions in preventing extremism, while also being of interest to the general reader.

**Ageing, Diversity and Equality** Sue Westwood, 2018-10-31 Current understandings of ageing and diversity are impoverished in three main ways Firstly with regards to thinking about what inequalities operate in later life there has been an excessive preoccupation with economic resources On the other hand less attention has been paid to cultural norms and values other resources wider social processes political participation and community engagement Secondly in terms of thinking about the who of inequality this has so far been limited to a very narrow range of minority populations Finally when considering the how of inequality social gerontology's theoretical analyses remain under developed The overall effect of these issues is that social gerontology remains deeply embedded in normative assumptions which serve to exclude a wide range of older people Ageing Diversity and Equality aims to challenge and provoke the above described normativity and offer an alternative approach which highlights the heterogeneity and diversity of ageing associated inequalities and their intersections The Open Access version of this book available at <https://www.taylorfrancis.com/books/9781351851329> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 licence
