Hendershot, 1973 **EPIE Educational Product Report** EPIE Institute, 1974 **Algebraic Methodology and Software Technology** Helene Kirchner, Christophe Ringeissen, 2003-08-02 This volume contains the proceedings of AMAST 2002 the 9th International Conference on Algebraic Methodology and Software Technology held during September 9-13 2002 in Saint Gilles les Bains Réunion Island France The major goal of the AMAST conferences is to promote research that may lead to setting software technology on a firm mathematical basis This goal is achieved through a large international cooperation with contributions from both academia and industry Developing a software technology on a mathematical basis produces software that is a correct and the correctness can be proved mathematically safe so that it can be used in the implementation of critical systems portable i.e independent of computing platforms and language generations and evolutionary i.e it is self adaptable and evolves with the problem domain All previous AMAST conferences which were held in Iowa City 1989 1991 Twente 1993 Montreal 1995 Munich 1996 Sydney 1997 Manaus 1999 and Iowa City 2000 made contributions to the AMAST goals by reporting and disseminating academic and industrial achievements within the AMAST area of interest During these meetings AMAST attracted an international following among researchers and practitioners interested in software technology programming methodology and their algebraic and logical foundations *Computer Aided Systems Theory - EUROCAST 2009* Roberto Moreno Díaz, Franz Pichler, Alexis Quesada Arencibia, 2009-09-30 The concept of CAST as Computer Aided Systems Theory was introduced by F Pichler in the late 1980s to refer to computer theoretical and practical developments as tools for solving problems in system science It was thought of as the third component the other two being CAD and CAM required to complete the path from computer and systems sciences to practical developments in science and engineering Franz Pichler of the University of Linz organized the first CAST workshop in April 1988 which demonstrated the acceptance of the concepts by the scientific and technical community Next the University of Las Palmas de Gran Canaria joined the University of Linz to organize the first international meeting on CAST Las Palmas February 1989 under the name EUROCAST 89 This proved to be a very successful gathering of systems theorists computer scientists and engineers from most European countries North America and Japan It was agreed that EUROCAST international conferences would be organized every two years alternating between Las Palmas de Gran Canaria and a continental European location From 2001 the conference has been held exclusively in Las Palmas Thus successive EUROCAST meetings took place in Krems 1991 Las Palmas 1993 Innsbruck 1995 Las Palmas 1997 Vienna 1999 Las Palmas 2001 Las Palmas 2003 Las Palmas 2005 and Las Palmas 2007 in addition to an extra European CAST conference in Ottawa in 1994 **Algebra in the Early Grades** James J. Blanton, 2017-09-25 This volume is the first to offer a comprehensive research based multi faceted look at issues in early algebra In recent years the National Council for Teachers of Mathematics

has recommended that algebra become a strand flowing throughout the K 12 curriculum and the 2003 RAND Mathematics Study Panel has recommended that algebra be the initial topical choice for focused and coordinated research and development in K 12 mathematics This book provides a rationale for a stronger and more sustained approach to algebra in school as well as concrete examples of how algebraic reasoning may be developed in the early grades It is organized around three themes The Nature of Early Algebra Students Capacity for Algebraic Thinking Issues of Implementation Taking Early Algebra to the Classrooms The contributors to this landmark volume have been at the forefront of an effort to integrate algebra into the existing early grades mathematics curriculum They include scholars who have been developing the conceptual foundations for such changes as well as researchers and developers who have led empirical investigations in school settings Algebra in the Early Grades aims to bridge the worlds of research practice design and theory for educators researchers students policy makers and curriculum developers in mathematics education **Database Management**

Instructional Guidance Slava Kalyuga, 2015-05-01 The book explores a cognitive load perspective on instructional guidance Cognitive load theory is focused on instructional design implications and prescriptions that flow from human cognitive architecture and it has become one of the leading theories of instructional design According to this theoretical perspective the purpose of instructional guidance is to reduce learner potential cognitive overload by providing appropriate information in the right time and in a suitable format As the learner's level of prior knowledge is considered as the main factor influencing this decision the effect of learner prior knowledge on effectiveness of instructional methods the expertise reversal effect in cognitive load theory provides the basic framework for the book The fully guided direct instruction and minimally guided inquiry discovery or exploratory learning are often discussed in instructional psychology literature as examples of approaches with opposed degrees of guidance provided to the learners This book considers the whole range of the levels of guidance including intermediate levels and approaches the problem of balancing learner guidance from a cognitive load perspective The significance of this approach is in applying our current knowledge of human cognitive architecture to develop an integrated instructional approach bringing together the best features and advantages of direct instruction and inquiry learning Both direct instruction and inquiry learning approaches have been around for long time and their proponents can produce evidence of their effectiveness This evidence needs to be treated within the context of appropriate learning goals in specific instructional settings for specific types of learners This book provides an unbiased theoretical framework for managing learner instructional guidance and working principles for selecting appropriate levels and methods of instructional guidance e.g. sequences of exploratory problems and explicit instruction forms and levels of embedded guidance and adapting methodologies optimal for learners at different levels of prior knowledge
