Choosing

Students Wayne Camara, Ernest W. Kimmel, 2005-03-23 This volume brings a variety of perspectives to bear on the issue of how higher education institutions can or should choose students during the early part of the 21st century. Many of the contributors report on research to develop and validate potential tools to assist those responsible for admission decisions. Other contributors however pose broader questions about the nature of selective admissions, about institutional responses to the changing demography of those seeking to enter higher education, or about the appropriate criteria of success in higher education. The volume is particularly timely because the question of how changes in admission tools and processes will affect campus diversity following the recent Supreme Court decision concerning the University of Michigan. Diversity is an important concern of all of the contributors and the chapter by Lee Bollinger, President at Michigan at the time the court cases were filed, is particularly relevant. This book brings together the research that underlies a variety of proposed approaches to improving the selection of students. Providing support for the integrity of the admissions process and the validity of new tools to help a higher education institution to select a diverse student body, this book explores the implications of the assessment component of K-12 school reform for higher education admissions practices. The diverse contributions to this volume reflect the current ferment in educational research and educational practice as institutions of higher education seek to develop a new admissions paradigm for coming decades following the University of Michigan decisions. This book is intended for those leaders and professionals who set admission policies and practices in American colleges and graduate and professional schools, as well as for those scholars and scientists who research, develop and validate tools for use in the process of choosing students in ways that are congruent with an institution's mission, values and goals. *Educational Assessment of Students* Anthony J. Nitko, Susan M. Brookhart, 2007 From two of the best known authors in the field of classroom assessment comes a revision of one of the best assessment books. Features include hundreds of examples, directions for crafting both traditional and alternative assessments, checklists for evaluating classroom assessments, scores of strategies for assessing problem solving and critical thinking, methods for aligning classroom assessment with state standards and NCLB requirements. Reviewers have described the book as the best on the market for its completeness and balanced approach to classroom assessment. **Assessing Student Outcomes - Why, Who, What, How?** J. Fredericks Volkwein, 2011-11-22 This volume offers administrators and practitioners a summary guide to assessment in higher education from the reasons for undertaking assessment to the delivery of findings. It opens with the questions that precede an effective study and drive research design: To what extent is the study aimed at educational improvement and to what extent is it aimed at external accountability? Are the results expected to demonstrate goal attainment, improvement, comparison to others, meeting standards, cost effective investment? What is the population from whom assessment data are being collected? Are we measuring the knowledge and skills of individuals and making decisions about their remediation, certification or development? Or are we sampling from particular groups of students and comparing them to each other or perhaps to themselves over time?

The core of the volume is devoted to the objects of assessment basic skills general education knowledge attainment in the major personal growth attitudes and satisfaction and alumni outcomes keeping in mind both cognitive and noncognitive measures One chapter describes common obstacles to effective assessment others describe conceptual models research methods and data collection strategies and instruments The concluding chapter underscores the importance of communicating research results effectively This is a special volume of the Jossey Bass higher education quarterly report series New Directions for Institutional Research Always timely and comprehensive New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management
