How to Wrap and Seal Parcels

Acceptable containers include corrugated or solid fibreboard, metal cans, tins or boxes, wooden boxes, or crates.

For double strength, use two boxes of the same size, seal off flaps, and telescope them.

Containers should be large enough to hold contents plus adequate padding to prevent damage, but not so large as to permit shifting or joggling of contents.

Wrap separately each item in the container.

Parcels containing breakable items should be marked fragile above the address and below the postage. Those containing fluids or other items which may decay or die should be marked perishable.

Seal all package openings, including those at each end of the parcel, with strong kraft paper tape or pressure sensitive gummed tape.

Outside wrapping should be at least equal in quality and strength to the kraft paper used for grocery bags.

Address correctly and legibly, including postal code.

- (a) poke telescopic holes in them
 (b) stand on them when you view the stars
 (c) push one inside the other
 (d) use boxes that are much larger than their contents
