World-maps for Finding the Direction and Distance to Mecca David King,2021-09-06 Two remarkable Iranian world maps were discovered in 1989 and 1995 Both are made of brass and date from 17th century Iran Mecca is at the centre and a highly sophisticated longitude and latitude grid enables the user to determine the direction and distance to Mecca for anywhere in the world between Andalusia and China Prior to the discovery of these maps it was thought that such cartographic grids were conceived in Europe ca 1910 This richly illustrated book presents an overview of the ways in which Muslims over the centuries have determined the sacred direction towards Mecca qibla and then describes the two world maps in detail The author shows that the geographical data derives from a 15th century Central Asian source and that the mathematics underlying the grid was developed in 9th century Baghdad **United States Reports** United States. Malcolm,Michael Roe,2003-06-30 The Cambridge International Workshop on Security Protocols has now run for eight years Each year we set a theme focusing upon a specific aspect of security protocols and invite position papers Anybody is welcome to send us a position paper yes you are invited and we don't insist they relate to the current theme in an obvious way In our experience the emergence of the theme as a unifying thread takes place during the discussions at the workshop itself The only ground rule is that position papers should formulate an

approach to some unresolved issues rather than being a description of a finished piece of work. When the participants meet, we try to focus the discussions upon the conceptual issues which emerge. Security protocols link naturally to many other areas of Computer Science and deep water can be reached very quickly. Afterwards we invite participants to re-draft their position papers in a way which exposes the emergent issues but leaves open the way to their further development. We also prepare written transcripts of the recorded discussions. These are edited in some cases very heavily to illustrate the way in which the different arguments and perspectives have interacted. We publish these proceedings as an invitation to the research community. Although many interesting results first see the light of day in a volume of our proceedings, laying claim to these is not our primary purpose of publication. Rather we bring our discussions and insights to a wider audience in order to suggest new lines of investigation which the community may fruitfully pursue.
