Metastatic Breast Cancer: From Diagnosis to Complete Remission Denice Jeffery, 2014-04 As a psychologist Denice Jeffery helped others learn to face their greatest fears with courage and integrity But on a dark day in 2005 she would need to learn how to apply those same support

strategies to her own life That day she learned that she had breast cancer Just five years later she was told that the cancer had metastasized spreading throughout her body A remarkable journey began then now she is officially in complete remission Here she shares her experiences honestly and intimately Although she had radiation she refused chemotherapy in favor of more natural therapies She bravely rejected her terminal diagnosis and started on a race for her very life hoping to unearth complementary strategies that could potentially ensure her survival In Part One she invites you into the life of a patient who refused to accept that there was nothing to be done In Part Two she details the strategies supplements and protocols she used to overcome her cancer Her story from diagnosis to complete remission and how she achieved that transformation offers hope to anyone facing cancer Not wanting to give up and just hand over to chemotherapy Ms Jeffery did her research and found a variety of alternatives that each had good if largely anecdotal successes but which made sense to her in terms of theory She also did a voyage through her own psyche to smooth the path and in the end has won the day and shares it all with the reader Dr Val Lewis Noosa Heads Queensland Australia

A Changing Epidemic and the Rise of Opioid and Stimulant Co-Use Justin Strickland, Kelly E. Dunn, Saeed Ahmed, 2022-08-02 Advanced

Therapeutics in Pain Medicine Sahar Swidan, Matthew Bennett, 2020-12-17 Chronic pain places a tremendous burden on both the patient and the healthcare system. The use of opioids to address pain has resulted in negative impacts. As practitioners work to undo the current opioid crisis, options to manage pain need a new approach. *Advanced Therapeutics in Pain Medicine* offers pioneering approaches to this intransigent problem, providing a functional medicine approach toward treating pain. This book is dedicated to the advancement of non-opioid therapeutic options that offer real progress in reaching a future of better pain management. With an emphasis on pathophysiology, chapters review various types of pain and propose comprehensive treatment plans. These include manual therapies, novel pharmacologic and plant-based approaches, hormonal effects on pain pathways, as well as psychological and lifestyle interventions. Features: Written by a multi-disciplinary team, the book provides clinicians with multiple non-opioid treatment considerations. Enables practitioners to shift from a one-size-fits-all treatment approach toward individualized patient care. Includes case studies to help educate the provider on how to implement treatment plans in practice. Written by a team of physicians, pharmacists, psychologists, and researchers, this important book offers a much-needed step forward in optimizing pain care and benefits practitioners who care for patients experiencing chronic pain.

The Comprehensive Physicians' Guide to the Management of PANS and PANDAS Scott Antoine, 2024-02-06 An evidence-based guide for doctors diagnosing, testing, and treating children with PANDAS (Pediatric Autoimmune Neuropsychiatric Disorder Associated with Strep infections). In the early 1990s, a group of researchers at the National Institute of Mental Health began collecting data on children who had developed neuropsychiatric disorders (OCD and tics) following infections. They found evidence that antineuronal antibodies had developed in some of these children, which attacked the basal ganglia region of the brain. MRI and PET scans in these children demonstrated inflammatory changes in the basal ganglia as well. In 1997, the researchers published the first article to describe this syndrome, which they named PANDAS (Pediatric Autoimmune Neuropsychiatric Disorder Associated with Strep infections). In PANDAS, an autoimmune attack on the brain occurs following a Strep infection. PANS (Pediatric Acute-onset Neuropsychiatric Syndrome) is a broader term that also includes cases following exposure to other infections, toxins, and even stress. Clinicians treating children with PANS and PANDAS have found that antibiotics targeted at the offending organisms, steroids, and IVIG result in marked improvement and occasionally complete remission of the neuropsychiatric symptoms. Disturbing symptoms consistent with many DSM-5 psychiatric disorders manifest in patients with PANS and PANDAS, yet we know that there is a biologic basis for the changes in these children. As a result, these disorders require us as physicians to view mental illness in an entirely new way. Resistance to this change in paradigm has made PANS and PANDAS difficult for clinicians to diagnose, unbearable for parents to endure, and controversial for scholars to accept. As such, there is no recognized standard of care. We have written this work in an effort to change that. This is a textbook by physicians for physicians. It was written to bring back some of the art of medicine to physicians caring for a group of children and families who really need it. PANS and PANDAS are complex

disorders that demand a rich multifaceted response with novel treatment approaches The material in this book is assembled from the peer reviewed medical literature in combination with over thirty years of clinical experience caring for the sickest patients both in and out of the hospital Here you will find conclusive evidence for the existence and pathophysiology of PANS and PANDAS alongside testing and treatment interventions the author has successfully used in his own practice with hundreds of children The book concludes with rich appendices including commonly used labs doses of medications and supplements a sample flare protocol extensive support for parents sample IVIG orders and much more We hope this resource allows you the physician to help these suffering families heal
