Product Safety & Liability Reporter ,2006 **Road and Track** ,2000 **Consumers Index to Product Evaluations and Information Sources** ,2000 **Rubber Product Failure** Roger P. Brown,2002 Rubber components are used in many demanding applications from tyres and seals to gloves and medical devices and failure can be catastrophic This review of Rubber Product Failure outlines and illustrates the common causes of failure while addressing ways of avoiding it There has been increasing pressure to improve performance so that rubbers can be used at higher temperatures and in harsher environments For example the under the bonnet temperature has increased in some vehicles and new medical devices require longer lifetimes in potentially degrading biological fluids The expectations of tyre performance in particular are increasing and retreads have been in the spotlight for failures The definition of failure depends on the application For example a racing car engine seal that lasts for one race may be acceptable but in a normal car a life span of 10 years is more reasonable If appearance is critical as in surface coatings and paints then discolouration is failure whilst in seals leakage is not acceptable Each rubber product must be fit for the use specified by the consumer Failure analysis is critical to product improvement the cause of the problem can be much harder to find It can range from a design fault to poor material selection to processing problems to manufacturing errors such as poor dimensional tolerances to poor installation product abuse and unexpected service conditions The rubber technologist must become a detective gathering evidence understanding the material type and using deductive reasoning Testing and analysis of failed materials and components add to the information available for failure analysis For example stored aged tyres appeared superficially to be alright for use but on drum testing small cracks grew more quickly than in new tyres leading to rapid failure in service Quality control procedures such as product inspection testing and material quality checks can help to reach 100 percent reliability In critical applications such as electricians gloves for high voltage working gloves are inspected before each use while engine seals may be routinely replaced before the expected lifetime to avoid problems in the literature is not high However several reviews have been

written on specific products and references can be found at the end of this review Around 400 abstracts from papers in the Polymer Library are included with an index Subjects covered include tyre wear and failure seals engine components rubber bonding failure rubber failure due to chloramine in water tank treads gloves and condoms medical devices and EPDM roofing membranes *F&S Index International Annual* ,1999 F & S Index United States ,1997 *Lemon-Aid Used Cars and Trucks 2011-2012* Phil Edmonston,2011-04-25 As Toyota skids into an ocean of problems and uncertainty continues in the U S automotive industry Lemon Aid Used Cars and Trucks 20112012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years Lemon Aid guides are unlike any other car and truck books on the market Phil Edmonston Canada s automotive Dr Phil for 40 years pulls no punches Like five books in one Lemon Aid Used Cars and Trucks is an expos of car scams and gas consumption lies a do it yourself service manual an independent guide that covers beaters lemons and collectibles an archive of secret service bulletins granting free repairs and a legal primer that even lawyers cant beat Phil delivers the goods on free fixes for Chrysler Ford and GM engine transmission brake and paint defects lets you know about Corvette and Mustang tops that fly off gives the lowdown on Honda Hyundai and Toyota engines and transmissions and provides the latest information on computer module glitches **Proceedings of the 1995 Global Vehicle Development Conference** ,1995 Complete contents of this book include the next decade the role of Russia in the global automotive industry global component sourcing a comparison of U S and overseas supplier relations global sourcing extending the enterprise the supplier role in product stewardship the strategic significance of standardization study of vapor generation from fuel system components global automotive industry and technology transfer past present and future vehicle architecture globalizing the development of innovative manufacturing processes needs and benefits environmental and economic evaluations of electric vehicles and Autoliv s road to globalization The Wall Street Journal ,2007 *F&S Index United States Annual* ,1997 Automotive News ,2007 **Predicasts F & S Index United States** ,1993 A comprehensive index to company and industry information in business journals Predicasts F & S Index International Annual ,1992 *Wall Street Journal Index* ,1994 **Notable Corporate Chronologies** ,2001 **Predicasts F & S Index** ,1992
