Patent Policy and Innovation Hazel V. J. Moir, 2013-01-01 Just how inventive are inventions More to the point just how inventive are the inventions covered by patents Not very according to Hazel Moir and there is no reason to doubt her conclusions She has spent years in painstakingly analysis of dozens of business method patents in Australia and elsewhere She finds they are no more than strategic devices intended to annoy and disrupt commercial competition and confuse the market Hazel Moir is a patent expert beholden to no patent theory and no patent interests In consequence her research is fresh and inspired Her conclusion that patents describe and protect obvious combinations of old ideas and trivial variations may not be confined to business methods It is a conclusion that demands the consideration of policymakers Stuart Macdonald Aalto University Helsinki Finland This book

presents a compelling attack on the patent system Thoughtfully analyzing the existing empirical literature and providing her own painstaking study of business method patents Hazel Moir explains how it is that patents have spread geographically and technologically with increasingly broad rights becoming ever easier to obtain Bravely and persuasively she recommends policymakers tackle one of the most vexing issues in patent law the quantum of new knowledge that ought to be required to make an invention worthy of protection Rochelle Dreyfuss New York University School of Law US Hazel Moir s book deserves to become a classic Between its covers one will find writing of great clarity and data that reveal the real world costs of the patent system After reading Moir s analysis one wonders what the actual social benefits of the patent system might be This is evidence based analysis at its best Peter Drahos Australian National University and Queen Mary University of London UK This book presents a compelling attack on the patent system Thoughtfully analyzing the existing empirical literature and providing her own painstaking study of business method patents Hazel Moir explains how it is that despite the intuitions of economists social scientists lawyers judges and even some inventors patents have spread geographically and technologically with increasingly broad rights becoming ever easier to obtain Bravely and persuasively she recommends policymakers tackle one of the most vexing issues in patent law the quantum of new knowledge that ought to be required to make an invention worthy of protection Rochelle Dreyfuss New York University School of Law US This empirical study uses a scientifically selected sample of patents to assess patent quality The careful evaluation of the assumptions in alternative economic theories about the generation and diffusion of new knowledge demonstrates that the height of the inventive step is critical to effective and efficient patent policy The book provides a practical introduction to the policy rules affecting the grant of patents particularly the rules making the inventive step so low It also offers insights into interactions between examiners and applicants during the patent application process Finally the book compares how the rules about inventiveness operate in the USPTO the EPO and the Australian Patent Office gives new insights into business method patenting and offers suggestions for raising the height of the inventive step Patent Policy and Innovation will appeal to academics researching in the patent field economists innovation and industry policy advisors patent policy makers NGO policy advisors and patent practitioners

Sea Ice Mohammed Shokr, Nirmal K. Sinha, 2015-03-30 Sea Ice Physics and Remote Sensing addresses experiences acquired mainly in Canada by researchers in the fields of ice physics and growth history in relation to its polycrystalline structure as well as ice parameters retrieval from remote sensing observations The volume describes processes operating at the macro and microscale e g brine entrapment in sea ice crystallographic texture of ice types brine drainage mechanisms etc The information is supported by high quality photographs of ice thin sections prepared from cores of different ice types all obtained by leading experts during field experiments in the 1970s through the 1990s using photographic cameras and scanning microscopy In addition this volume presents techniques to retrieve a suite of sea ice parameters e g ice type concentration extent thickness surface temperature surface deformation etc from space borne and airborne sensor data The

breadth of the material on this subject is designed to appeal to researchers and users of remote sensing data who want to develop quick familiarity with the capabilities of this technology or detailed knowledge about major techniques for retrieval of key ice parameters Volume highlights include Detailed crystallographic classification of natural sea ice the key information from which information about ice growth conditions can be inferred Many examples are presented with material to support qualitative and quantitative interpretation of the data Methods developed for revealing microstructural characteristics of sea ice and performing forensic investigations Data sets on radiative properties and satellite observations of sea ice its snow cover and surrounding open water Methods of retrieval of ice surface features and geophysical parameters from remote sensing observations with a focus on critical issues such as the suitability of different sensors for different tasks and data synergism Sea Ice Physics and Remote Sensing is intended for a variety of sea ice audiences interested in different aspects of ice related to physics geophysics remote sensing operational monitoring mechanics and cryospheric sciences

Narrative, Interrupted Markku Lehtimäki, Laura Karttunen, Maria Mäkelä, 2012-08-31 Recent postclassical narratology has constructed top down reading models that often remain blind to the frame breaking potential of individual literary narratives Narrative Interrupted goes beyond the macro framing typical of postclassical narratology and sets out to sketch approaches more sensitive to generic specificities disturbing details and authorial interference Unlike the mainstream cognitive approaches or even the emergent unnatural narratology the articles collected here explore the artifice involved in presenting something ordinary and realistic in literature The first section of the book deals with anti dynamic elements such as dialogue details private events and literary boredom The second section devoted to extensions of cognitive narratology addresses spatiotemporal oddities and the possibility of non human narratives The third

section focuses on frame breaking fragmentarity and problems of authorship in the works of Vladimir Nabokov The book presents readings of texts ranging from the novels of Don DeLillo and Thomas Pynchon to the Animal Man comics The common denominator for the texts discussed is the interruption of the chain of events or of the experiential flow of human like narrative agents

Zambesi Lawrence Dritsas, 2010-03-31 Zambesi tells the story of David Livingstone s Zambesi Expedition It exposes the rivalry among some of Victorian Britain s leading establishment figures and institutions including the Foreign Office the Royal Society Royal Geographical Society British Museum Kew Gardens and the Admiralty as abolitionists scientists and entrepreneurs sought to promote and protect their differing interests Making use of letters documents and materials neglected by previous writers and researchers the author reveals how tensions arose from the very beginning between those in pursuit of knowledge for its own sake and the proponents of the civilizing missions who saw scientific knowledge as the utilitarian means to a social end The result is an exciting story involving one of England s

most feted Victorian heroes that offers important new insights in the practice and politics of expeditionary science in Victorian England This is the definitive account of the expedition to date

A Concise Guide to Geopressure Peter B. Flemings, 2021-03-25 Geopressure drives fluid flow and is important for hydrocarbon exploration carbon sequestration and designing safe and economical wells This concise guide explores the origins of geopressure and presents a step by step approach to characterizing and predicting pressure and least principal stress in the subsurface The book emphasizes how geology and particularly the role of flow along permeable layers drives the development and distribution of subsurface pressure and stress Case studies such as the Deepwater Horizon blowout and laboratory experiments are used throughout to demonstrate methods and applications It succinctly discusses the role of elastoplastic behaviour the full stress tensor and diagenesis in pore pressure generation and it presents workflows to predict pressure stress and hydrocarbon entrapment It is an essential guide for academics and professional geoscientists and petroleum engineers interested in predicting pressure and stress and understanding the role of geopressure in geological processes well design hydrocarbon entrapment and carbon sequestration

Native American Nationalism and Nation Re-building Simone Poliandri, 2016-05-01 Bringing together perspectives from a variety of disciplines this book provides an interdisciplinary approach to the emerging discussion on Indigenous nationhood The contributors argue for the centrality of nationhood and nation building in molding and concurrently blending the political social economic and cultural strategies toward Native American self definitions and self determination Included among the common themes is the significance of space conceived both as traditional territory and colonial reservation in the current construction of Native national identity Whether related to historical memory and the narrativization of peoplehood the temporality of indigenous claims to sovereignty or the demarcation of successful financial assets as cultural and social emblems of indigenous space

territory constitutes an inalienable and necessary element connecting Native American peoplehood and nationhood The creation and maintenance of Native American national identity have also overcome structural territorial impediments and may benefit from the inclusivity of citizenship rather than the exclusivity of ethnicity In all cases the political effectiveness of nationhood in promoting and sustaining sovereignty presupposes Native full participation in and control over economic development the formation of historical narrative and memory the definition of legality and governance SUNY Press has collaborated with Knowledge Unlatched to unlock KU Select titles The Knowledge Unlatched titles have been made open access through libraries coming together to crowd fund the publication cost Each monograph has been released as open access making the eBook freely available to readers worldwide Discover more about the Knowledge Unlatched program here <https://www.knowledgeunlatched.org> and access the book online at the SUNY Open Access Repository at <http://hdl.handle.net/20.500.12648/8474> Sleepless Marie Darrieussecq, 2023-09-05 A restless inquiry into the cultural and psychic sources of insomnia by one of contemporary French literature's most elegant voices Plagued by insomnia for twenty years Marie Darrieussecq turns her attention to the causes implications and consequences of sleeplessness a nocturnal suffering that culminates at 4 a.m. and then defines the next day Insomniac mornings are dead mornings she observes Prevented from falling asleep by her dread of exhaustion the next day Darrieussecq turns to hypnosis psychoanalysis alcohol pills and meditation Her entrapment within this spiraling anguish prompts her inspired ingenious search across literature geopolitical history psychoanalysis and her own experience to better understand where insomnia comes from and what it might mean There are those she writes in Rwanda whose vivid memories of genocide leave them awake and transfixed by complete horror there is the insomnia of the unhoused who have nowhere to put their heads down The hyperconnection of urban professional life transforms her bedroom from a haven to a dormant electrified node Ranging between autobiography clinical observation and criticism *Sleepless* is a graceful inventive meditation by one of the most daring inventive novelists writing today

Instruments for Tropospheric Investigations Based on Optical Spectroscopy from Mobile Platforms Alexis

Merlaud, 2013-03-31 This thesis presents the development of four different remote sensing instruments dedicated to atmospheric research and their use in field campaigns between 2008 and 2012 The instruments are based on uv visible spectrometers and installed respectively on a scientific aircraft ultralight aircraft and cars One of the instruments is targeted to operate from an Unmanned Aerial Vehicle UAV The Differential Optical Absorption Spectroscopy DOAS technique is used to quantify the molecular absorption in the spectra of scattered sky light These absorptions are then interpreted by modeling the transfer of radiation in the atmosphere Airborne platforms enable new measurement geometries leading for instance to a high sensitivity in the free troposphere On the other hand a miniaturization effort is required especially for the instruments onboard ultralight aircraft and UAV Reaching the limited size weight and power consumption is possible through the use of

compact spectrometers and computers together with custom built electronics circuits and housings A common target of the different experiments is to quantify tropospheric nitrogen dioxide NO₂ Regarding this trace gas the developed instruments provide complementary findings such as the vertical distribution in the pristine Arctic or the levels in the exhaust plumes of large cities like Riyadh Car borne measurements in North West Europe reveal the horizontal gradients of surface NO₂ at various scales The UAV payload is intended to produce high spatial resolution maps of tropospheric NO₂ columns
