**On a Global Mission: The Automobiles of General Motors International Volume 3** Louis F. Fourie, 2016-12-29  
Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

**Automotive Industrialisation** Kaoru Natsuda, John Thoburn, 2020-10-14  
This book looks at the industrial policies of Southeast Asian economies in their motor vehicle industries from early import substitution to policy making under the more liberalised WTO policy regime. The book examines how inward automotive investment, especially from Japan, has been affected by policies and how such investment has promoted industrial development in the late industrialising economies within ASEAN (Association of Southeast Asian Nations). It provides insights into the automotive industry of Southeast Asia in terms of production volumes, sales volumes, market structure and trade. Through country case studies, the book is a useful reference and illustrates how industrial policies in Southeast Asia have affected the spread of automotive development in the region. It will appeal to policy makers and researchers interested in the automobile industry, industrial policies in the industry and the spread of development from foreign investors to local firms.

**The New Domestic Automakers in the United States and Canada** A.J. Jacobs, 2015-12-16  
Over the past forty years, state, provincial and local governments in the United States and Canada have provided foreign automakers with approximately 480 billion in incentives in order to lure light vehicle assembly plants to their areas. This has included tax abatements, infrastructure construction, land giveaways, job training programs and other subsidies. As of early 2015, ten foreign vehicle makers operated 20 light vehicle plants in developed North America. Despite the fact that all ten of these automakers have pursued a similar pattern, first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America, each has followed its own specific historical development path and has created its

own unique growth trajectory This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and or Canada through early 2015 In addition it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada This includes the first foreign automaker to build its cars in the United States De Dion Bouton of France in July 1900 the early 20th Century endeavors of Fiat Mercedes and Rolls Royce and the present day hopes of Chinese and Indian automakers In the process the text also provides an assessment of the top competing states and sites for any future plants the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker Overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant Its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in North America and worldwide
