Early Years Science Education Mike Watts, Alison Silby, 2020-04-28 The educational provision for early years is growing and changing across many parts of the world not least in the UK While this book leans heavily on the mounting literature on

early child development in its broadest sense physically emotionally linguistically its central focus lies squarely on the growth of children's scientific thinking and activities Written by educators this book is based both on formal educational research and professional practice in action The authors describe children's science concept development their curiosity driven exploration emergent ecological literacy their learning through science play the assessment of early learning the role of parents and practitioners within early education contexts and some question the very basis of the science being taught Illustrations and examples of practice are not confined to the UK though the messages to be derived from each chapter have application way beyond the immediate context This book was originally published as a special issue of *Early Child Development and Care*

Pretend Play Among 3-year-olds Hermina Sinclair, 2013-05-13 translated by Hermina and Morris Sinclair This book was written by a group of researchers with a common theoretical constructivist framework and using the same methods of naturalistic observation and data analysis They considered that collective pretend play would provide excellent opportunities for understanding young children's thinking especially when play arose spontaneously in a familiar environment In such play children often manifest types of knowledge that cannot be captured through experimental

work or by observation in adult devised situations Spontaneous play brings out children s own preoccupations their know how in negotiating with one another in order to make sustained play possible their ability to construct coherent sequences and their often surprising insight into adult behavior Play sequences are reported in full and sometimes dramatic detail in each of the chapters Different activities were elicited by different situations though all were observed in the familiar environment of day care centers Different situations play with toys such as cups spoons and dolls with pieces of cloth string and cardboard with grass pebbles and swings in the yard or with hand held puppets allow the authors to discover often unsuspected knowledge among three year olds communicative socio affective societal and psycho social At the same time the authors underline the similarity of the interactive construction processes The data and their analyses provide a solid base for two of Piaget s theoretical arguments peer interaction leads to collaborative processes at an early age and collaboration leads to objective knowledge via the attribution of shared meanings to jointly constructed experiences *Children and Languages* Rosemarie Benya, Kurt E. Müller, 1988 *Journey to Literacy* Krista Flemington, Linda Hart-Hewins, Una Villiers, 2011 The play based learning and individualized strategies in this practical book build on the wide range of literacy skills present in the kindergarten classroom This valuable resource explores simple ways to use traditional learning centres to provide children with real and authentic reasons to listen speak read write and view Teachers will find a wealth of resources for creating meaningful learning experiences including answers to often asked questions milestones to inform teaching instruction activities and games for both individuals and groups literacy extensions that involve children with quality literature authentic artifacts and recordings This highly readable book will support teachers as they move beyond worksheets and nurture students on their journey to lifelong literacy
