and apply theory to practice      Nine Algorithms That Changed the Future John MacCormick,2020-09-15 Nine revolutionary algorithms that power our computers and smartphones Every day we use our computers to perform remarkable feats A simple web search picks out a handful of relevant needles from the world s biggest haystack Uploading a photo to Facebook transmits millions of pieces of information over numerous error prone network links yet somehow a perfect copy of the photo arrives intact Without even knowing it we use public key cryptography to transmit secret information like credit card numbers and we use digital signatures to verify the identity of the websites we visit How do our computers perform these tasks with such ease John MacCormick answers this question in language anyone can understand using vivid examples to explain the fundamental tricks behind nine computer algorithms that power our PCs tablets and smartphones

**Behavioral Neuroscience** George Spilich,2023-05-16 Behavioral Neuroscience by George Spilich presents the neurophysiological aspects of behavior to the 21st century digital native learner in the context of human experience rather than in that of laboratory experiments with non human animals Whether a student has enrolled in the course to prepare them for a career in medicine or science or they are fulfilling a general education science requirement Behavioral Neuroscience is written to meet them where they are The text has an accessible writing style real life examples and data sets active learning exercises and multimodal media and quizzes all designed to make the subject more engaging and relevant This ground breaking first edition is ideal for the Introductory Behavioral Neuroscience or the Biological Psychology course      Mosby's Essential Sciences for Therapeutic Massage - E-Book Sandy Fritz,2012-04-16 The fourth edition of this science essentials text for massage students features new full color photos and illustrations along with an easy to read conversational style that explains A P concepts clearly The book not only helps students learn the information they need to pass certification exams but it also helps them see how scientific content applies to actual practice This new edition also features a very enhanced Evolve resource package along with new material on boosting your knowledge of nutrition and research two subjects of growing interest in the massage therapy profession Clinical reasoning activities included in the workbook section for each chapter promote problem based learning Format combining workbook and textbook features gives you immediate review tools in the form of matching exercises short answer questions fill in the blank questions drawing exercises and critical thinking questions Sections on pathologic conditions feature intervention protocols as well as indications and contraindications for therapeutic massage Expert author Sandy Fritz provides credibility and authority to the information presented Practical Applications boxes in each chapter enable you to see the way material applies to real practice and supports competency based learning Highly illustrated format features over 700 full color line drawings and photos Updated chapters and artwork have all been revised to reflect the most current industry information and reviewer feedback MTBOK mapping for instructors on the Evolve website includes a mapping document that links the student objectives in the book to the components of the MTBOK New muscle illustrations in Chapter 9 clearly show attachments and actions as well as the

relationships between different muscles in composite drawings Coverage of nutrition now in Chapter 12 includes information on the digestive process basics of solid nutrition how vitamins and minerals affect the body and how proper nutrition affects the functions of all systems of the body Enhanced pathology and indications contraindications appendix includes more illustrations to increase your understanding of what you may encounter during practice Improved biomechanics chapter activities that use photos instead of drawings help you better understand and apply gait assessment and muscle testing concepts

Olfaction in vector-host interactions Willem Takken, Bart G.J. Knols, 2023-09-04 This is a multi authored book with a focus on the role of olfaction the sense of smell in the multitude of interactions between arthropods and their blood hosts Blood feeding arthropods mostly insects ticks and mites depend on a vertebrate host for survival and reproduction Their evolutionary success depends on how efficiently they can detect the presence of a host and actively locate it to obtain a blood meal This is the domain of olfaction which is perhaps the most important mode of signal exchange between hosts and blood feeding arthropods that visit them Important human and animal diseases like malaria dengue West Nile virus bluetongue and trypanosomiasis are transmitted between humans and or animals as a direct outcome of olfactory responses mediated by host odours Increased understanding of olfaction and how this governs interactions between arthropods and blood hosts will enable the development of novel strategies to disrupt this behaviour For example many species of tsetse fly respond over distance to simple blends of synthetic odours Combined with traps or insecticide treated targets such odour baited devices can effectively suppress fly populations and thus transmission of sleeping sickness Such systems still need to be developed for disease vectoring mosquitoes flies and ticks necessitating further knowledge on the chemical basis of interactions with their vertebrate hosts In 18 peer reviewed chapters recognized experts provide a state of the art overview of olfaction in vector host interactions from the molecular to population biology level A wide range of arthropods is discussed including mosquitoes black flies sand flies tsetse flies blood feeding bugs and ticks Novel ideas definition of research gaps and a collection of the most recent studies will be of value to biology students chemical ecologists as well as those implementing vector control programmes
