The Mine Investors' Guide Floyd Davis, 1909 *China's Grand Strategy Under Xi Jinping* Niv Horesh, 2020-11-29 This book attempts to identify change and continuity in PRC grand strategy and the extent to which Chinese imperial history complicates PRC global outreach in the Xi Jinping era Empires convey the wish to make the world a better place even in the midst of oppression and are eschatological in their rhetoric However empires that last longer have been more pragmatic in their grand strategy sometimes appropriating the aura of past golden ages and at other times learning from the mistakes of their predecessors To date Chinese strategic thinkers are preoccupied with learning lessons from the disintegration of the USSR and fascinated by the secrets of American power Interdisciplinary in its reach analysing grand strategy through both rhetoric and praxis this book unpacks the Chinese world view through critical examination of the latest history textbooks currently in use in PRC middle schools It also brings new evidence to bear on the debate in the West about Chinese strategic culture Finally it compares historical Japanese OFDI patterns with China in order to understand what makes the Chinese economy unique China's Grand Strategy Under Xi Jinping is aimed towards students and scholars of history international business and wider Chinese studies *Corruption and Illegality in Asian Investment Arbitration* Nobumichi Teramura, Luke Nottage, Bruno Jetin, 2024-04-19 This open access book explores Asian approaches towards investment arbitration a transnational procedure to resolve disputes between a foreign investor and a host state setting it in the wider political economy and within domestic law contexts It considers the extent to which significant states in Asia are or could become rule makers rather than rule takers regarding corruption and serious illegality in investor state arbitration Corruption and illegality in international investment are widely condemned in any society but there remains a lack of consensus on the consequences especially in investment arbitration A core issue addressed is whether a foreign investor violating a host state's law should be awarded protection of its investment as per its contract with the host state and or the applicable investment

or trade agreement between the home state and the host state Some suggest such protection would be unnecessary as the investor committed a crime in the host state while others attempt to establish an equilibrium between the investor and the host state Others claim to protect investment invoking the sanctity of promises made The book starts with a deep dive into economic and legal issues in corruption and investment arbitration and then explores the situation and issues in major countries in the region in detail It is a useful reference point for lawyers economists investors and government officials who are seeking comprehensive and up to date information on anti bribery rules in Asian investment treaties It is of particular interest to students and researchers in economics finance and law who are undertaking new research relating to the multifaceted impacts of corruption
